

sign hanging systems

From our economy banner-rail, sign-hanging rail, to our snazzy NX series SNAPRAIL™, Popco offers sign-hanging options for most every project.

Popco's sign hangers accommodate thin or thick stocks, light or heavy signs and long-term installations as well as short-term programs with frequent sign change-outs.

SPR series SNAPRAIL™

Popco's original poster-hanging rail features a quick-change, bottom-feed feature for simple sign changing. SNAPRAIL™ is ideal for suspending posters and for gripping a variety of stocks.

Place the SNAPRAIL™ on a flat surface. Insert posters into the open bottom. Close the SNAPRAIL™ by pressing down in the center and working towards the outside edges. The rail will "snap" closed, gripping stock tightly. Insert banner clips into the top track of the SNAPRAIL™ to create hanging points.

specs

- 1" high x ¼ deep
- stock lengths: 22", 24", 36", 48", & 72"
- available in clear, white & black PVC

configurations

- available in custom lengths
- banner clips, which create hanging points, sold separately
- splints, for joining multiple snap rails, sold separately

uses & features

- grip sign materials from .005" to .070" thick
- use for card stocks & soft, flexible, & slippery stocks
- closes easily once sign stock is inserted, gripping stock firmly
- rounded "toe" on swinging door skims over stock, reducing crumpling & scratching of sign material
- reusable, great for short & long-term signage programs

item #	length	colors	material
SPR-22	22"	clear	PVC
SPR-24	24"	white	co-extrusion
SPR-36	36"	black	UV resistant
SPR-48	48"		in clear
SPR-72	72"		

specify color when ordering

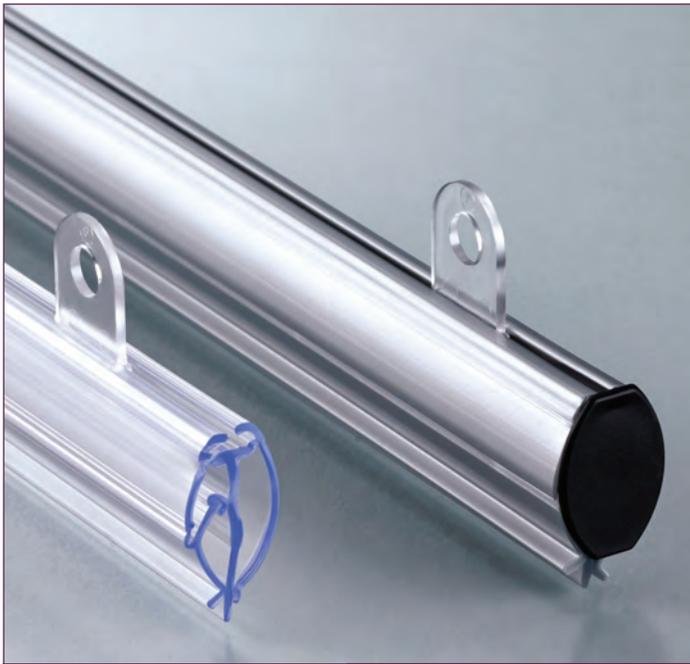

BRC-2 banner clips create closed-loop connection points on the top of the SNAPRAIL™

BRC-7 banner clips create open-loop connection points on the top of the SNAPRAIL™

metal splints allow multiple pieces of SNAPRAIL™ to be joined together, extending width

see page 8 for more information on the parts above

shown, above, with & without end caps — end caps use is optional & cosmetic only

NX end caps, shown right, are available in black & clear PVC

NX series SNAPRAIL™

The NX series poster hanging rails are extra-rigid lengthwise, making them ideal for long graphics. The oval profile and the use of end caps gives the NX SNAPRAIL™ a highly finished look.

The NX series SNAPRAIL™ opens and closes just as the SPR series does. The same banner clips and splints work with both NX and SPR series of SNAPRAIL™. *see details on page 4*

specs

- 1.03" high x .56" deep
- stock lengths: 22", 24", 36", 48" and 72"
- available in clear and silver PVC

configuration

- available in custom lengths
- optional end caps are sold separately
- banner clips, which create hanging points, sold separately
- splints, for joining multiple NX snap rails, sold separately

uses & features

- grip sign materials from .007 to .070 thick
- for card stocks, light styrene, vinyl & fabrics
- * heavier bodied & more rigid lengthwise than SPR SNAPRAIL™
- ideal for wide graphics
- bottom section opens to accept stock, then closes gripping stock firmly

See ceiling connectors in hanging hardware / page 10. Shown above, the C-Hook with string.

Wire hooks are ideal for hanging in combination with BRC-2 closed-loop banner clips.

Steel looped cables are ideal for hanging in combination with BRC-7 open-loop banner clips.

see pages 10, 11 & 12 for more information on the parts above & other ceiling connectors

banner clips sold separately

mini snap rail

Mini SNAPRAIL™ features a visually discrete profile and is intended to hang lightweight signs weighing up to 20 ounces. The mini SNAPRAIL™ is an inexpensive and reusable alternative to poster tinning.

- .70" high x .235" thick in six stock lengths
- grips thin, light-weight sign stocks from .005" to .020" thick
- designed to close easily once sign stock is inserted
- compatible with BRC-2 and BRC-7 banner clips (page 8)

BRC-7 series banner clips sold separately

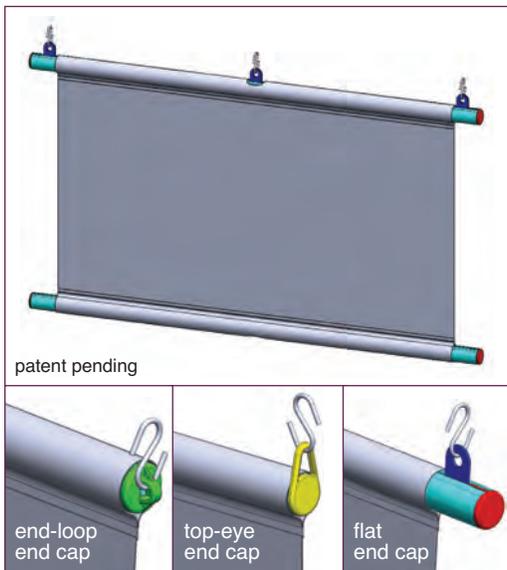

superail poster-grip rail

SR2 superail replaces the discontinued SBR series poster spines. The SR2 has been made thinner and lighter, without compromising its strength. A wide opening at the bottom accepts thick stock, but, with internal gripping fins, the SR2 tightly grips thinner stock as well.

- grips sign stock from .020" to .080" thick
- use at the top of posters to stiffen and to create a hanging point with banner clips
- use at the bottom of posters to add weight and prevent curling and bowing
- compatible with BRC-7 banner clip universal (page 8)

flat end cap

GruVbanner pocket tube™

Hang fabric and vinyl banners that include hanging "pockets" with the GruVbanner pocket tube™. This all-new product is available in a number of lengths, and features three styles of endcaps. Two of the end caps include integral hanging points. Additionally, the tube is also compatible with BRC-2 and BRC-7 banner clips (the parts that create hanging points on our SNAPRAIL™ and other poster hanging products).

- compatible with 1" diameter banner pockets
- use the **end-loop** end caps for short and medium length banners
- use the **top-eye** end caps, with BRC-2 banner clips for center support when hanging long banners
- use a second GruVbanner pocket tube™ at the bottom of banners to keep banners taught
- s-hooks and other hanging hardware are sold separately

product details available online

Visit popco-usa.com and search for the GruVbanner pocket tube™.

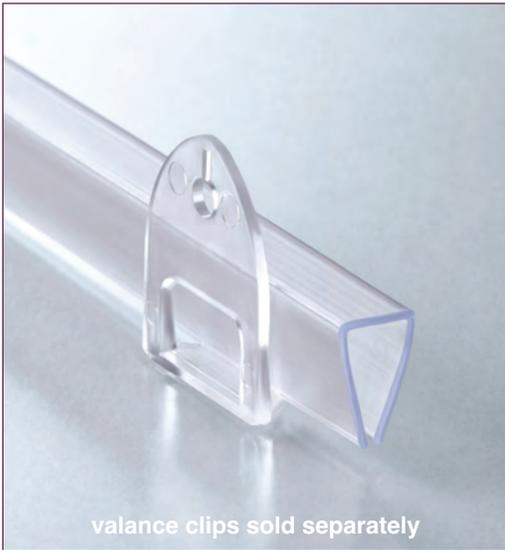

banner clips sold separately

banner rail

The economy banner rail is a cost-effective means of hanging light signs on windows, walls or from ceilings. The curved, pinch-grip bottom flexes open to accept poster stock and makes the banner rail particularly useful for signs that will be changed frequently.

- clear PVC 5/8" tall by 9/32" wide
- grips sign stock from .01" to .035" thick
- sign stock slides into either open end of banner rail then grips tightly
- compatible with BRC-2 and BRC-7 banner clips (page 8)

item #	length	colors	material
BR-22	22"	clear	PVC UV resistant
BR-24	24"

valance clips sold separately

PT-2 series poster rail

PT-2 poster rail is a cost-effective means of hanging light signs on windows, walls or from ceilings. The triangular, pinch-grip bottom flexes open to accept poster stock and makes the PT-2 particularly useful for signs that will be changed frequently.

- 1/2" high x 5/16" deep
- grips sign stock from .005" to .125" thick
- use at the top of posters to stiffen and to create a hanging point with valance clips
- use at the bottom of posters to add weight and prevent curling and bowing
- compatible with valance clips (page 8)

item #	length	colors	material
PT-2-22	22"	clear	PVC UV resistant

PT-2-48	48"		

valance clips sold separately

PT-3 series poster rail

PT-3 poster rail is a cost-effective means of hanging light signs on windows, walls or from ceilings. The flared, bottom-loading feature flexes open to accept poster stock and makes the PT-3 particularly useful for signs that will be changed frequently.

- 5/8" high x 3/16" deep
- grips sign stock from .005" to .125" thick
- use at the top of posters to stiffen and to create a hanging point with valance clips
- use at the bottom of posters to add weight and prevent curling and bowing
- compatible with valance clips (page 8)

item #	length	colors	material
PT-3-22	22"	clear	PVC UV resistant
PT-3-24	24"		
PT-3-36	36"		
PT-3-48	48"		

banner clip

Banner clips provide a hanging point when used with a number of Popco's poster hanging rails. Banner clips slide into the top groove of a poster hanging rail and are easily positioned along the length of the rail.

- create hanging points for SNAPRAIL™, NX SNAPRAIL™ and banner rail
- the clip's t-shaped base corresponds with the poster rail's t-shaped groove
- the clips slide in the rail's groove for easy positioning and hanging flexibility

item #	dimensions	colors	material
BRC-2C	.80" tall	clear	polycarbonate
BRC-2B	.60" wide	black	plastic

banner clip universal

Universal banner clips fit all of Popco's hanging rails, including the unique SR2 poster spine. These clips create hanging points on the poster rails and are an "open" style that allows for use with steel looped cable.

- create hanging points for SNAPRAIL™, NX SNAPRAIL™, SR2 and banner rail
- the clip's t-shaped base corresponds with the poster rail's t-shaped groove
- the clips slide in the rail's groove for easy positioning and hanging flexibility

item #	dimensions	color	material
BRC-7	1" tall .90" wide	clear	polycarbonate plastic

valance clip

Valance clips provide a hanging point when used with Popco's PT-2 and PT-3 series poster hanging rails. Valance clips slide into the bottom opening of a poster rail and are easily positioned along the length of the rail.

- create hanging points for PT-2, and PT-3 poster rails
- the clip's L-shaped "lip" slides into the open bottom of the poster rails
- the clips slide in the bottom of the rails for easy positioning and hanging flexibility

item #	dimensions	color	material
VC-4	1" tall .75" wide	clear	polycarbonate plastic

metal splint

Metal splints provide a connection point when combining multiple lengths of Popco's poster hanging rails. Metal splints slide into the top groove of poster hanging rails, bonding the rails together.

- use to join multiple pieces of SNAPRAIL™, NX SNAPRAIL™ and banner rail
- metal splints are bowed to hold tightly inside the top grooves of poster rails and create a secure bond between multiple rails

item #	dimensions	color	material
MS metal splint	.165" high 2.5" long	silver	plated steel

poster hanging kit with c-hook & string

This kit is intended for light to mid-weight signs hung from grid ceilings. Each kit is heat-sealed in a clear plastic bag, making it easy to package and ship along with your signage.

- kits contain: (2) SPR SNAPRAIL™, (2) banner clips, and (2) c-hooks with string
- an instruction sheet is included with each kit
- SNAPRAIL™ grips sign materials from .005" to .070" thick

item #	length	colors	materials

specify color when ordering

hanging hardware

From our light-duty barbed string to our super-strong wire hooks, we offer sign-hanging options for most every project. Combined with our sign-hanging rails, Popco's

hanging hardware accommodates thin or thick stocks, light or heavy signs and long-term installations as well as short-term programs with frequent sign changes.

c-hooks with string

C-hooks with string are used to hang lightweight signs from ceiling grids. Eight feet of string (in either black or white), or six feet of monofilament extends from the hook, and a barbed end connects to your sign.

- 2-1/2" high x 2-1/4" wide, lightweight hook in white
- with black or white polyester string or monofilament
- with a silver colored metal barb at the end of the string opposite the hook
- sold in bags of 100

item #	string length	string color	materials
CHB-8	8 feet	black	plastic c-hooks with polyester string or monofilament string and metal barbs
CHW-8	8 feet	white	
CGH-6MF	6 feet	clear	

metal squeeze clip with string

Metal squeeze-clips with string are used to hang lightweight signs from ceiling grids. Six feet of string, in white, extends from the clip and a barbed end connects to your sign.

- 3-1/4" high x 1-1/4" wide lightweight metal squeeze-clip
- white polyester string with a silver colored metal barb at the end opposite the clip
- sold in bags of 100

item #	string length	string color	materials
SQS-6	6 feet	white	zinc-finish steel clip with polyester string

ceiling twist clip with string

Ceiling twist-clips with string are used to hang lightweight signs from ceiling grids. Six feet of white string extends from the clip and a barbed end connects to your sign. A simple twist locks the clip onto the grid securely.

- 1-15/16" wide x 1" high, lightweight white plastic clip
- white polyester string with a silver colored metal barb at the end opposite the clip
- sold in bags of 100

item #	string length	string color	materials
CTC-6	6 feet	white	plastic twist clip with polyester string

barbed strings

Barbed strings are most often used for lightweight sign hanging and with mobiles, to connect multiple sign panels. Popco's barbed string is available in a black or white, and in a number of lengths.

- black or white polyester string
- metal barbs on both ends of the string
- sold in bundles of 100

item #	length	colors	materials
SB-1	1"	black	polyester string and metal barbs
SB-2	2"	white	
SB-3	3"	<i>specify when ordering</i>	
SB-6	6"		
SB-9	9"		
SB-12	12"		

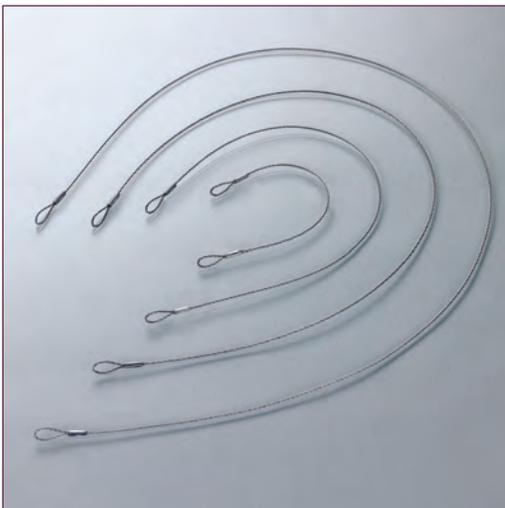

2-piece ceiling bar hook

2-piece ceiling bar hooks create an extra-secure hanging point from ceiling grids. They are quick to install, easily repositioned and are ideal for hanging heavy signs as well as light weight signs.

- 1/4" high top slot grips ceiling grids
- 3/8" diameter opening provides hanging point
- left and right side pieces interlock to grip ceiling grids
- sold in sets of one left and one right piece

item #	dimensions	color	materials
BAR-L/R	1-1/2" tall 1" wide	white	coated aluminum alloy

steel looped-end cables

Steel looped-end cable is intended for long-term sign hanging. This extra-strong cable is perfect for supporting heavy signs.

- extra-strong, but thin and visibly discrete
- compatible with open-style hanging hardware such as s-hooks
- works with Popco's BRC-7 banner clip universal (see page 8)

item #	length	colors	materials
STC-6	6"	matte	1/32" diameter steel cable with metal crimp
STC-12	12"	silver	
STC-18	18"		
STC-24	24"		

jet wires

Jet wires are an adjustable, tangle-free, hook and wire hanging system. They are designed for lightweight and medium weight signs. With just a pull, jet wires “telescope” out to a desired length and then stay at that length making it easy to hang signs at a variety of heights.

- made of spiraled wire (not spring)
- ideal for quick adjustment of signs hung at various heights
- JSW-4 sold in batches of 100
- JSW-5 sold in batches of 50

item #	length / extension	colors	material
JSW-4	from 6" to 4 feet	matte	spiraled
JSW-5	from 8" to 5 feet	silver	metal wire

wire hooks

Wire hooks are intended for hanging heavy signs at specific heights. Popco's shortest wire hooks are also used to hang multiple signs, one above the other. Wire hooks are a simple, reliable and very popular product.

- 3/32" diameter in five lengths: 4", 6", 12", 18" and 24"
- hang medium and heavy weight signs (up to 20 lbs.)
- strong, durable and reusable
- all sizes are sold bundles of 50

item #	length	colors	material
WH-4	4"	silver	smooth plated steel
WH-6	6"	black	
WH-12	12"		
WH-18	18"		
WH-24	24"		

specify color when ordering

jack chain

Jack chain is intended for hanging heavy signs at specific (fixed) heights. Meant to be cut to desired lengths and used in combination with Popco's 1" s-hook, jack chain is a straight forward product, well suited for long-term and short-term sign installations.

- hang medium and heavy weight signs (up to 20 lbs.)
- available cut to specific lengths and kitted for custom orders
- compatible with the S-1LT s-hook
- strong, durable and reusable
- sold on rolls measuring 250 feet long

item #	dimensions	color	material
JackChain	1-1/16" long x 1/4" wide links	silver	zinc-plated steel
Roll	1/4" diameter link opening		

s-hooks

S-hooks are intended for hanging heavy signs and are often used in combination with our jack chain. S-hooks are also ideal for connecting multiple sign panels, one above another, and are well suited for long-term and short-term sign installations.

- available in 1", 1-5/8", 2" and 2-7/8" lengths
- hook opening is approximately 3/16" for the small s-hook
- hook opening is approximately 3/8" across for the medium and large s-hooks
- hook opening is approximately 3/4" across for the largest s-hook

item #	length	wire diameter	colors	material
S-1LT	1"	0.086"	silver	zinc-plated steel
S-1.6	1-5/8"	0.131"		
S-2	2"	0.146"		

figure-8 clip

Figure 8 clips are a strong, economical means of hanging signs from grid ceilings. The clips squeeze open and grip ceiling grids when released. These simple, versatile clips are easily installed, removed and repositioned.

- hang light and medium weight signs from grid ceilings
- strong, durable and reusable
- rust proof
- sold in bags of 100

item #	dimensions	color	material
F-8	1-1/4" wide x 2-1/2" high .060" wire diameter	silver	zinc-plated steel

metal squeeze clip

Figure 8 clips are a strong, economical means of hanging signs from grid ceilings. The clips squeeze open and grip ceiling grids when released. These simple, versatile clips are easily installed, removed and repositioned.

- hang light and medium weight signs from grid ceilings
- strong, durable and reusable
- rust proof
- sold in bags of 100

item #	dimensions	color	material
SQ-8	1-5/8" wide x 3-1/8" high .060" wire diameter	silver	zinc-plated steel

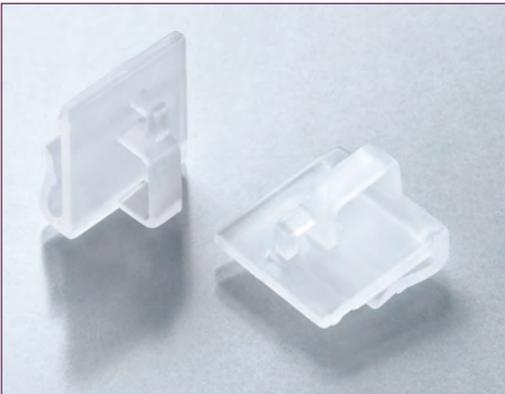

pear clip

Pear clips are a strong, economical means of hanging banners and signs from tubular sign frames or pipe-and-drape. The clips are also useful for hanging tags or instruction booklets from products such as lawnmowers or snow blowers. Easily opened with a squeeze, pear clips are extra-secure when closed.

- hang medium and heavyweight signs
- strong, durable reusable and rust proof

item #	dimensions	color	material
PC-X	1-3/8" wide x 2-1/2" high .060" wire diameter	silver	zinc-plated steel

grid hanger

The grid hanger is a simple, cost-effective means of creating a hanging point on a grid ceiling. Two connection-point options mean that the grid hanger will work well with a number of sign hangers; from small jet wires and barbed string, to large wire hooks. Grid hangers are lightweight and visually understated.

- small opening accepts .116" dia. inserts, large opening accepts .181" dia. inserts
- sold in bags of 100

item #	dimensions	color	material
GH-2	.750" top x .615" bottom	natural	zinc-plated steel

hanging buttons

This adhesive button creates a hanging point from nearly any vertical or horizontal smooth surface. The button is ideal for lightweight signs and is often used to connect tags to furniture such as from the underside of tables and chairs.

- hanging loop accepts .114" dia. inserts
- attach to smooth surfaces and hang lightweight signs and product tags
- white buttons features white foam tape, black buttons features black foam tape

item #	dimensions	colors	materials
HB-1A	3/4" dia. button	black	styrene
HB-1A	3/8" tall	white	permanent foam tape

ceiling twist loop

The ceiling twist loop locks onto suspended ceiling grids with a simple twist and creates a heavy-duty hanging point suitable for large banners and posters.

- hanging loop accepts 7/8" dia. inserts
- hang medium and heavyweight banners and posters
- a highly finished, reusable part

item #	dimensions	colors	materials
CTL-2	2" dia. base 1-3/4" tall	white	molded plastic

large adhesive disc

The large adhesive disc creates a hanging point from any vertical or horizontal smooth surface. It is ideal for light and medium weight signs and the metal-loop, which forms the hanging point, rotates to accommodate rigid metal hooks.

- hanging loop accepts 3/16" dia. inserts
- hang light and medium weight signs
- ideal for use with jet wires or wire hooks (see page 12)

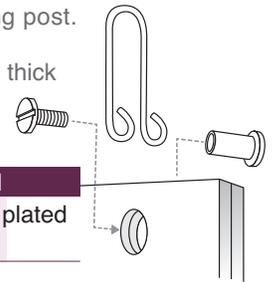

item #	dimensions	colors	materials
ADH-150	1-1/2" dia. base 1-1/4" tall	white	molded plastic with steel loop permanent foam tape

u-loop sign hangers

Position u-loop hangers over sign stock and connect to the stock using binding posts and screws. This produces a secure hanging point on thick stock that has been drilled with 1/4" holes to accommodate the binding post.

- hang medium and heavy signs in stock from 1/8" to 3/4" thick
- accommodates 1/4" dia. posts in 1/2" and 3/4" lengths
- sold in bags of 100

item #	dimensions	color	material
UL-2	2" high 3/4" wide	silver	smooth plated steel

pigtail ceiling mount

The pigtail ceiling mount "corkscrews" directly into acoustic ceiling panels to create a hanging point for lightweight signs.

- 1/4" loop ID, accepts 3/16" dia. inserts
- repositionable and reusable
- sold in bags of 100

item #	dimensions	color	material
PCM-1	1-1/4" overall length .040" wire diameter	silver	zinc-plated steel

magnetic hanging disc

Create an attachment point on metal surfaces with the magnetic hanging disc. This part is ideal for hanging lightweight signs from drop-ceiling grids. Magnetic hanging discs are quickly installed and easily repositionable.

- 5/16" hook opening
- meant for indoor use on ferrous metal surfaces
- strong, attractive and reusable

item #	dimensions	color	material
MA-1	1" diameter base 1-3/4" high	white	coated metal & magnetic disc

foam board hanger

Create hanging points on your foam board displays without drilling or the use of grommets. This “dog tooth” style hanger affixes to foam board by hand. The hinged hanging point folds down for shipping, and easily flips up to hang your display.

- .28” hole, accepts 3/16” inserts
- the “tooth” height is .165”
- use for material 3/16” thick or greater
- extra barb locks the hanger to the board
- hinged design makes shipping easy
- sold in bags of 100

item #	dimensions	colors	material
FBH1	5/8” wide 2” high	silver	nickel-plated steel

monofilament

Clear monofilament can be used for hanging lightweight signs and is virtually invisible, eliminating visual distraction or visual competition with the sign’s graphics.

- used to hang lightweight signs
- strong, inexpensive and long lasting
- visually discrete, allowing hanging signs to be the primary visual

item #	roll dimensions	colors	material
MONO-40	2-5/8” wide 2-1/2” high	clear	monofilament 40 lb. test

c-hook

Popco’s c-hook is large enough to fit over drop ceiling grids and can then be passed through openings in sign panels. This part is often used to connect multiple sign panels, one above another. The c-hook is strong and can support both light and heavy sign panels.

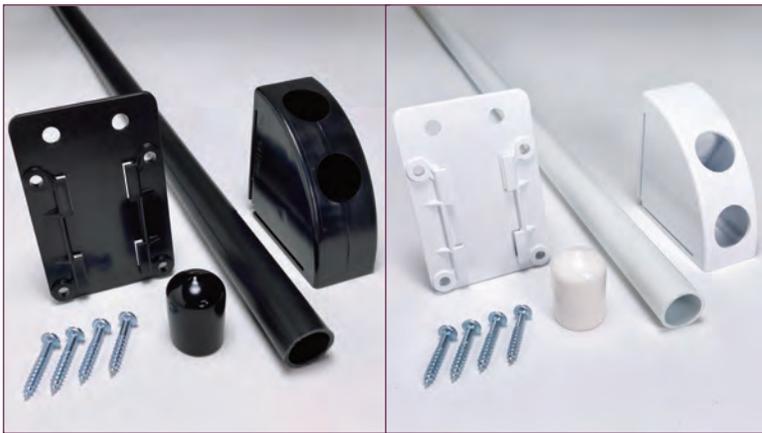

- use to connect multiple panels in hung sign arrays
- the overall height of the c-hook is great enough to fit over ceiling grids
- also compatible with adjustable “bullet” style sign hangers

item #	dimensions	color	material
CL-3	1-1/4” wide x 3” long 5/8” opening	silver	zinc-plated steel

flag pole system

Display flags, banners and posters in multiple positions with our banner flag pole kit. Made from outdoor-grade PVC, this kit is ideal for both indoor and outdoor use.

The kit includes all the components needed to display flags, banners and posters in four different positions and can be mounted to vertical or horizontal surfaces.

banner flag pole kit

kit contents

- (1) baseplate with tape
- (1) pole-mount curved boot
- (1) 31" split-tube flag pole
- (1) flag-pole end cap
- (4) mounting screws

component dimensions

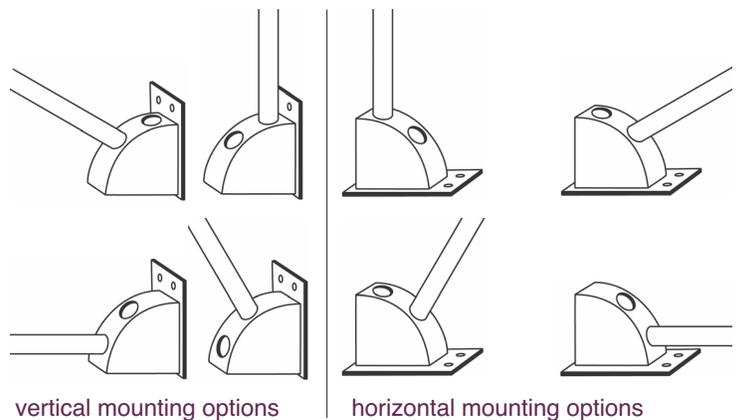

- 2-1/8" wide x 3-1/8" high base plate
- 1-1/8" wide x 2-1/2" high x 2-1/2" deep curved mounting boot
- 3/4" outside diameter x 31" long split-tube flag pole
- 3/4" inside diameter x 1-1/4" long end cap
- 1" pan-head, slotted-style, mounting screws

uses & features

- mount the base plate using adhesive on back, or use the base plate holes and screws for extra-secure mounting
- slide the curved boot into the baseplate to support the flag pole in a vertical position or a 30° angled position
- reverse the boot position in the baseplate to support the flag pole in a horizontal position or a 60° angled position
- the baseplate can be mounted vertically or horizontally as shown in the diagrams below
- drape flags and banners that have hanging loops or a hanging sleeve over the flag pole
- insert card-stock posters in the "split" opening on the flag pole
- ideal for both long-term promotions and frequently changed banners and posters
- strong, long lasting and ready for repeat uses

item #	dimensions	colors	material
FP-31	3/4" dia. x 31" long flag pole	black white	PVC UV resistant

horizontal mounting options

sign bases

Popco offers everything from small, adhesive-backed bases to wide bases that require no adhesive. We also have magnetic bases that are as easily repositioned as

they are strong. Some of our sign-bases can be used in food settings and all of our bases will help your signs stand out in a retail setting.

heavy duty finned sign foot

The heavy-duty finned sign foot grips stock from 3/16" to 1/4" thick. Downward titled fins on the inside of the sign foot create a secure grip on the sign stock. A wide base with permanent, peel-and-stick foam tape, keeps signs from tipping.

- 1.6" wide x 1-3/8" tall
- grips styrene, coroplast, gator and foam-board stock from 3/16" to 1/4"
- a slight flare at top makes it easier to insert stock

item #	length	tape style	color	materials

113006R	6"			
113049R	49"			

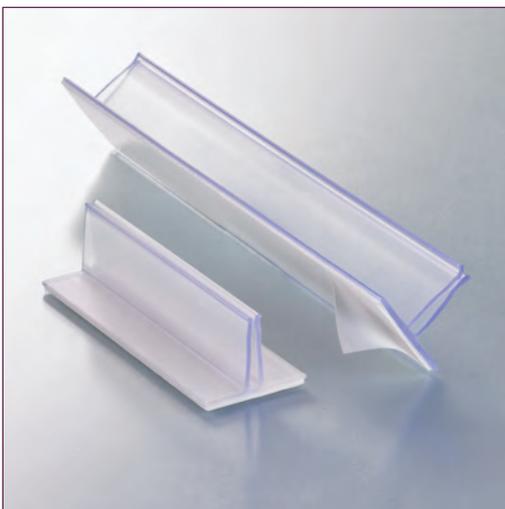

new narrow sign foot

The new narrow sign foot, with a "teardrop" shaped profile, grips stock up to 3/16" thick. The narrow "footprint" of this sign foot makes it ideal for use in areas where counter or shelf space is limited. Peel-and-stick permanent foam tape on the bottom of the base keeps signage from tipping.

- 1" wide x 7/8" tall
- grips various rigid stocks up to 3/16" thick
- a slight flare at top makes it easier to insert stock
- the teardrop profile spreads to accept thicker stock, then grips tightly at the top to hold stock securely

NSF-6	6"			
NSF-49	49"			

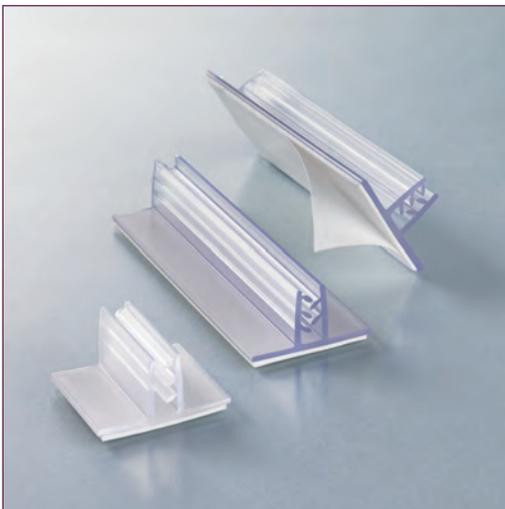

finned narrow sign foot

The finned narrow sign foot has a straight-sided profile and grips stock up to .085" thick. Downward-tilted fins on the inside of the sign foot create an extra-secure grip on the sign stock and the narrow "footprint" of this sign foot makes it ideal for use in areas where counter or shelf space is limited.

- .575" wide x .525" tall
- grips various rigid stocks up to .085" thick
- fin design makes for excellent gripping and easy inserting of stock

item #	length	tape style	color	materials
FNF-109-1	1"	permanent	clear	PVC UV resistant 1/32" white foam tapes
FNF-109-3	3"			
FNF-109-49	49"			
FNF-109-1R	1"	removable		
FNF-109-3R	3"			

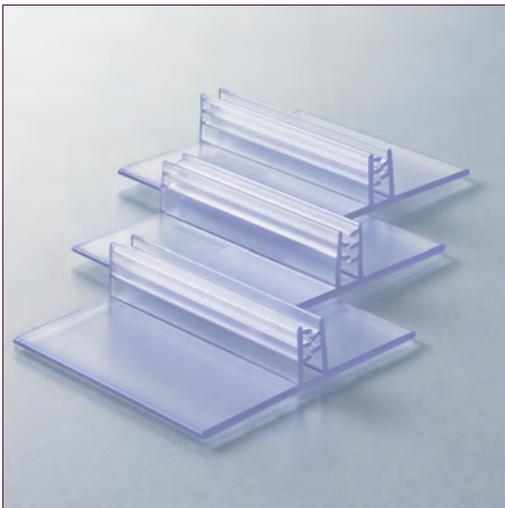

finned medium sign foot

The finned medium sign foot has a straight-sided profile and grips stock up to .085 thick. Downward-tilted fins on the inside of the sign foot create an extra-secure grip on the sign stock and a wide base with permanent, peel-and-stick foam tape, keeps signs from tipping.

- 1.085" wide x .525" tall
- grips various rigid stocks up to .085" thick
- fin design makes for excellent gripping and easy inserting of stock

item #	length	tape style	color	materials
FMF-110-1	1"	permanent	clear	PVC UV resistant 1/32" white foam tape
FMF-110-3	3"			
FMF-110-3R	3"			

finned wide sign foot

The finned wide sign foot has a 2" square base with no adhesive. This small, but stable sign base grips stock up to .060" thick. Downward-tilted fins on the inside of the sign foot make inserting stock easy and grip the stock securely. This sign foot hold small signs on flat horizontal surfaces.

- 2" wide x 2" long sign base
- 1/2" tall sign-grip area
- support sign stocks up to .060" thick
- fin design makes for excellent gripping and easy inserting of stock
- wide base negates the need for foam tape on the base

item #	length	tape style	color	materials
FWF-111-2	2"	no tape	clear	PVC UV resistant

finned diverse sign foot

The finned diverse sign foot is an extremely versatile, T-shaped sign base that accepts stock as thin as .125" (1/8") and as thick as .1875" (3/16"). A unique staggered fin design accounts for the range of stock the sign foot will hold. Permanent foam tape, removable metal shelf tape, or magnet, on the base makes the sign foot extra stable.

- 1" wide x 3/4" tall x 3" long
- support sign stocks from 1/8" to 3/16" thick
- with magnet on the base, the sign foot is easily repositioned
- with semi-permanent foam tape, the sign foot can be removed without leaving tape residue on the mounting surface

item #	length	tape style	color	materials
FDF-112-3	3"	semi permanent	clear	PVC - UV resistant
FDF-112-3M	3"	foam tape		foam tape
FDF-112-48	48"			channel magnet

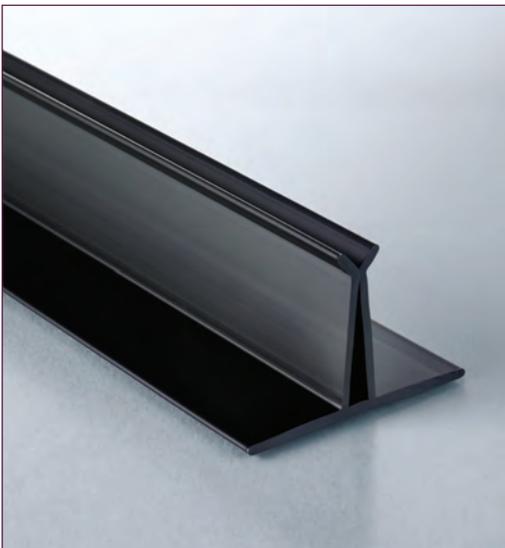

sign gripper flexi sign foot

The sign gripper flexi sign foot has downward-tilted fins on the inside of the sign foot for an extra-secure grip on the sign materials. A flexible point between the base and the sign grip allows signs to "give way," a feature that protects signs from being damaged and is helpful when restocking product. With permanent, peel-and-stick foam tape on the base.

- 1" wide x 1" tall
- holds stock up to 1/10" thick
- a flexible point between the base and the sign grip allows signs to flex

item #	length	tape style	color	materials
SGF-100-3	3"	permanent	clear	PVC - UV resistant
SGF-100-49	49"	foam tape		1/32" white foam tapes

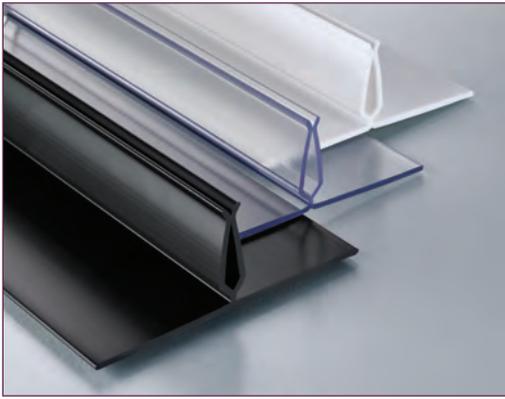

2" sign foot

The 2" sign foot is a heavy-duty support for thick sign stocks such as styrene. It accepts stock up to 3/16" thick and the wide base prevents stock from tipping without the need for adhesives on the base. This product is often used in grocery store coolers, combined with branded styrene inserts, to created dividers between produce & meats.

- 2" wide x 1-1/8" tall with a 3/16" bottom opening
- support sign stocks up to 3/16" thick
- a slight flare at top makes it easier to insert stock
- ABS (Acrylonitrile Butadiene Styrene) is FDA approved for use around food

item #	length	tape style	color	materials
SF-2-12	12"	no tape	black	ABS plastic safe for food settings
SF-2-24	24"			
SF-2-49	48"			

extra wide sign foot

The extra-wide sign foot is a heavy-duty support for thick sign stocks such as coroplast or styrene. It accepts stock up to 3/16" thick and the wide base prevents stock from tipping without the need for adhesives on the base.

- 3-1/4" wide x 7/8" tall — supports sign stocks up to 3/16" thick
- a slight flare at top makes it easier to insert stock

item #	length	tape style	colors	materials
EWSF-6	6"	no tape	clear	PVC <i>UV resistant in clear</i>
EWSF-12	12"		black	
EWSF-49	49"		white	

specify color when ordering — note: 12" lengths are stocked in white only

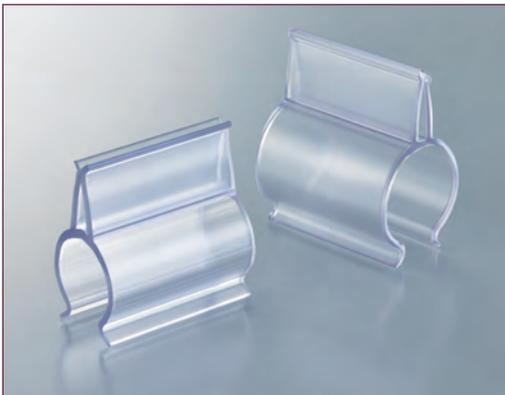

mini card holder

This small sign holder accepts stock from 15 to 60 point. It is available both with and without foam tape on the base. With a very small footprint, the mini card holder is ideal for use in areas where counter or shelf space is limited.

- unique profile allows for a use with a wide range of stocks, from 15 to 60 point
- profile makes insertion of stock easy and yet the stock is gripped securely

item #	dimensions	tape style	color	materials
UMC-1	1" tall	no tape	white	PVC
UMC-2	.75" square base	permanent		

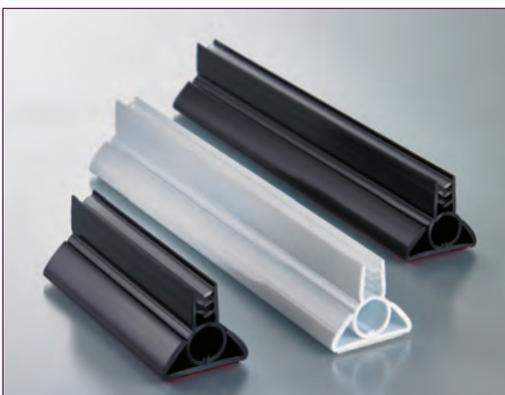

tube grip sign holder

The tube grip sign holder snaps easily onto tubes such as bicycles and lawn mower handles. The sign-gripping mount holds materials up to 1/16" thick.

- .585" tall sign grip
- TG1-1.5 grips tubes 1" in diameter
- TG2-1.5 grips tubes 3/4" in diameter

item #	dimensions	tape style	color	materials
TG2-1.5	.75" dia. x 1.5" long	no tape	clear	PVC
TG1-1.5	1" dia. x 1.5" long			UV resistant

adjustable sign holder

This sign base grips light stock and remains securely in place with permanent foam tape on the base. Two-piece construction allows the finned sign-grip top part to rotate within the triangular base so that signs can be displayed at a 90 degree flag position, or angled back for best viewing in a variety of settings.

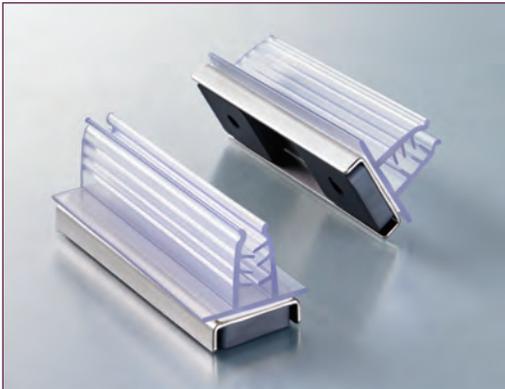

- 1-1/8" wide x 1" high
- accepts stock up to .080" thick

item #	length	tape style	colors	materials
ASH-3B	3"	black foam tape	black	PVC <i>UV resistant in clear</i>
ASH-6B	6"	black foam tape	black	
ASH-6W	6"	white foam tape	white	permanent foam tape

magnetic bases

The practicality of Popco's magnetic parts can't be overstated. Simply attach them to a metal surface, insert your sign, and you're done. If a sign needs to move,

just move it — no adhesive residue will be left on the mounting surface. Best of all, our magnetic parts can be used over and over. This makes them a great value.

finned diverse sign foot

The finned diverse sign foot is a versatile, T-shaped, sign base that accepts stock from .125" (1/8") to .1875" (3/16"). In addition to varieties that include removable tape, this part is also available with a magnetic base.

- support sign stocks from 1/8" to 3/16" thick
- with magnet on the base, the sign foot is easily repositioned
- for more details on the FMF-112 series of sign feet, see page 20

item #	dimensions	color	materials
FDF-112-3M	1" wide x 3" long .75" high	clear	PVC - UV resistant channel magnet

magnetic sign-base boot

Use the magnetic sign boots, in combination with the matching heavy-walled poster channels, to mount signs to metal surfaces. Signs can be held in either a horizontal or vertical format, and these robust parts can be reused many times.

- steel-sandwiched ceramic magnet provides strong grip on suitable metal surfaces
- poster channels will hold materials .010" to .125" thick
- combine with MSR series poster channels (page 27)

item #	dimensions	colors	materials
MBSB-B	2.25" wide x 2.75" high .75" high	black	ABS plastic
MBSB-W		white	channel magnet

magnetic channels

Ceramic magnets, mounted inside steel channels, create a super strong magnetic bond that can be used in a variety of point-of-purchase applications.

- adhere signs or display elements to metal surfaces
- combine channel magnets with sign bases for extra-secure sign display

item #	dimensions	colors	materials
MA-2	.875" wide x .25" high x 1" long	silver	steel channel magnet
MA-3	.875" wide x .25" high x 3" long		

magnetic hanging disc

Create an attachment point on metal surfaces with the magnetic hanging disc. This part is ideal for hanging lightweight signs from metal drop-ceiling grids. Magnetic hanging discs are quickly installed and easily repositionable.

- 5/16" hook opening
- meant for indoor use on ferrous metal surfaces
- strong, attractive and reusable

item #	dimensions	color	material
MA-1	1" diameter base 1-3/4" high	white	coated metal & magnetic disc

squeeze-clip sign holders

Displaying small signs doesn't get any easier — clip to hold securely, twist your sign into nearly any position, and you're in business with the squeeze-clip sign holders.

If you'd prefer to slide your sign into a channel rather than pinch the sign with a clip, we've got those styles too. These robust, reusable products will last a good long time.

small squeeze-clip small sign holder

Use small squeeze-clip/small sign holders to attach signs to a variety of retail surfaces such as wire racks, shelving, product dividers, or existing signage. An articulating knuckle allows for easy positioning of signs.

- 3" overall height — sign holder 1-1/8" wide x 5/8" tall
- bottom spring-clip grips material up to 3/8" thick
- sign holder accepts stock from .008" to .020" thick

item #	color	packaging	material
SGSH	clear	bags of 100	polycarbonate

small squeeze-clip large sign holder

Use small squeeze-clip/large sign holders to attach signs to a variety of retail surfaces such as wire racks, shelving, product dividers, or existing signage. An articulating knuckle allows for easy positioning of signs.

- 3-1/8" overall height — sign holder 2" wide x 3/4" tall
- bottom spring-clip grips material up to 3/8" thick
- sign holder accepts stock from .008" to .020" thick

item #	color	packaging	material
SGLGH	clear	bags of 100	polycarbonate

large squeeze-clip sign holder

Use large squeeze-clip sign holders to attach signs to a variety of retail surfaces such as acrylic dividers, carpeting, metal tubing, wire racks and shelves. An articulating knuckle allows for easy positioning of signs.

- 4" overall height — sign holder 2" wide x 3/4" tall
- bottom spring-clip grips material up to 1" thick
- sign holder accepts stock from .008" to .020" thick

item #	color	packaging	material
LGLH	clear	bags of 25	polycarbonate

small double squeeze-clip

Use the small double squeeze-clip to attach signs of varying thickness to a variety of retail surfaces such as metal shelving, wire baskets, product dividers or to existing signage. An articulating knuckle allows for easy positioning of signs.

- 3-3/4" overall height"
- bottom spring-clip grips material up to 3/8" thick
- holds signs up to 3/8" thick

item #	color	packaging	material
SGSG	clear	bags of 100	polycarbonate

large double squeeze-clip

Use the large double squeeze-clip to attach signs of varying thickness to a variety of retail surfaces such as metal shelving, wire baskets, product dividers or to existing signage. An articulating knuckle allows for easy positioning of signs.

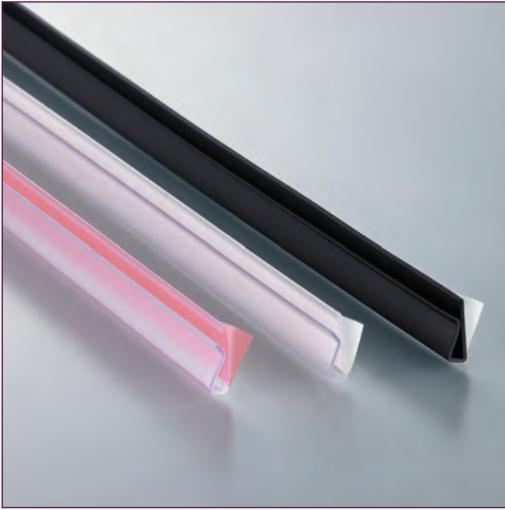

- 4-1/4" overall height — top sign grip 3-1/8" wide x 3/4" tall
- bottom spring-clip grips material up to 1" thick
- holds signs up to 3/16" thick

item #	color	packaging	material
LGXLG	clear	bags of 25	polycarbonate

sign channels

Popco's J, H and C-shaped channels are products that allow retailers and grocers to frequently change prices and marketing messages by simply sliding their inserts into the channels. Some of our channels are at fixed

heights, such as our 1.25-inch C-channels. Other channels, such as our J-channels, can be positioned to accommodate inserts of greater heights. All of our channels are practical and essential in retail settings.

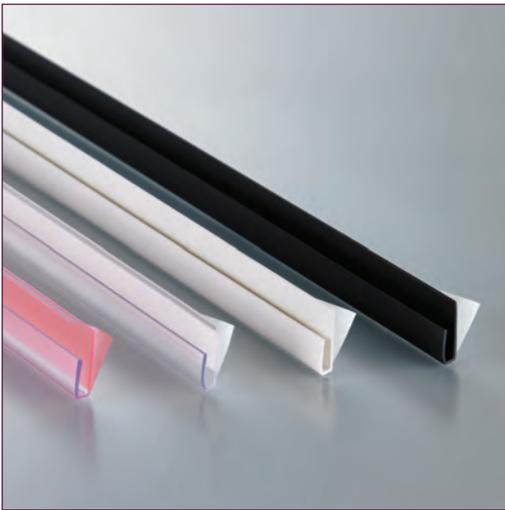

sc-60 series sign grip

The SC-60 series of sign channels grips material up to 3/32" thick and mounts securely to vertical surfaces with either permanent, peel-and-stick foam tape, or high-tack acrylic film tape.

- 1/2" mounting base x 3/8" front sign-grip lip
- grips material up to 3/32"
- the teardrop profile spreads to accept a wider array of stock
- the teardrop profile also grips tightly at the top to hold stock securely

item #	length	colors	tape style	material
SC-60-48	48"	clear	permanent white foam	PVC
SC-61-48	48"	clear	permanent acrylic film	UV resistant in clear
SC-62-48	48"	black	permanent black foam	

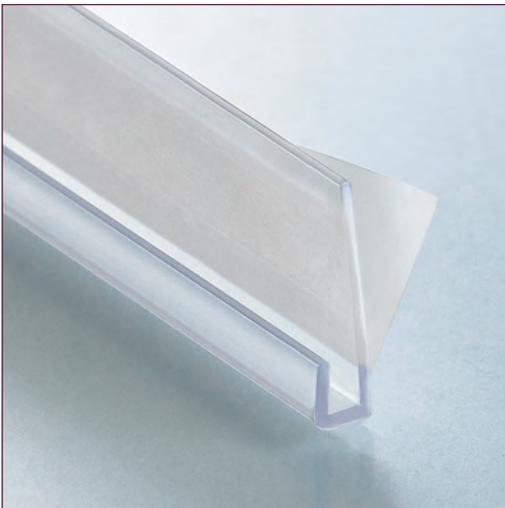

sc-70 series sign channel

The SC-70 series of sign channels holds material up to .070" thick and mounts securely to vertical surfaces with either permanent, peel-and-stick foam tape, or high-tack acrylic film tape.

- 5/8" mounting base x 3/8" front sign-grip lip
- holds material up to .070"
- the open "J" profile allows signs to easily slide in the channel for positioning
- use the channel at the top and bottom to keep signs from bowing or dropping out

item #	length	colors	tape style	material
SC-70-48	48"	clear	permanent white foam	PVC
SC-71-48	48"	clear	permanent acrylic film	UV resistant in clear
SC-72-48	48"	white	permanent white foam	
SC-73-48	48"	black	permanent black foam	

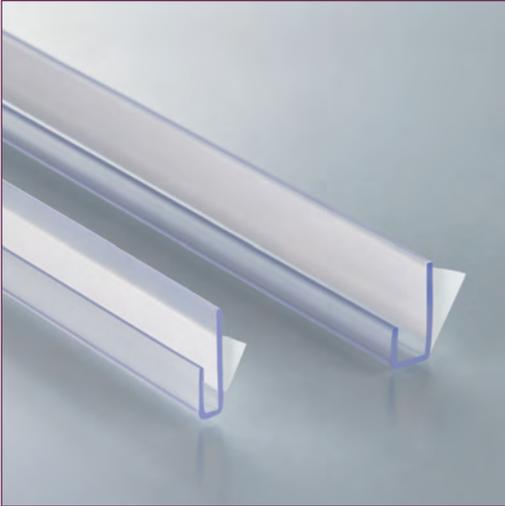

sc-80 sign channel

The SC-80 series of sign channels holds material up to .060" thick and mounts securely to vertical surfaces with permanent peel-and-stick foam tape.

- 5/8" mounting base x 3/16" front sign-grip lip
- holds material up to .060"
- the open "J" profile allows signs to easily slide in the channel for positioning
- the SC-80 features a low front lip for minimal blocking of your sign's printed area
- use the channel at the top and bottom to keep signs from bowing or dropping out

item #	length	colors	tape style	material
SC-80-48	48"	clear	permanent white foam	PVC UV resistant

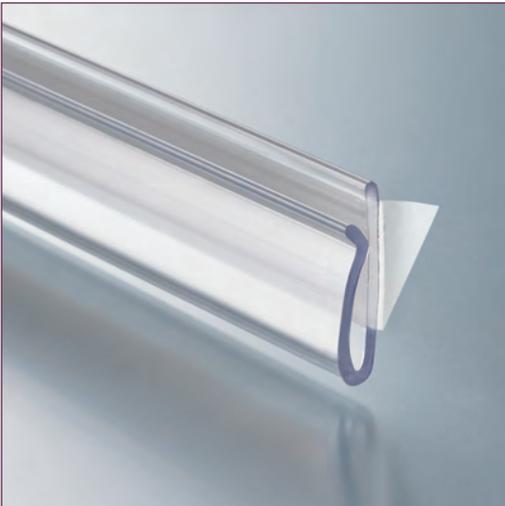

jc series sign channel

The JC series of sign channels holds thick materials, either 1/8" (with the JC-125) or 1/4" (with the JC-250). Permanent peel-and-stick foam tape mounts signs securely to vertical surfaces.

- JC-125: 3/4" mounting base x 5/16" front sign-grip lip — holds material up to 1/8"
- JC-250: 3/4" mounting base x 3/8" front sign-grip lip — holds material up to 1/4"
- the open "J" profile allows signs to easily slide in the channel for positioning
- use the channel at the top and bottom to keep signs from bowing or dropping out.

item #	length	colors	tape style	material
JC-125-48	48"	clear	permanent white foam	PVC <i>UV resistant</i>
JC-250-48	48"	clear	permanent white foam	PVC <i>UV resistant</i>

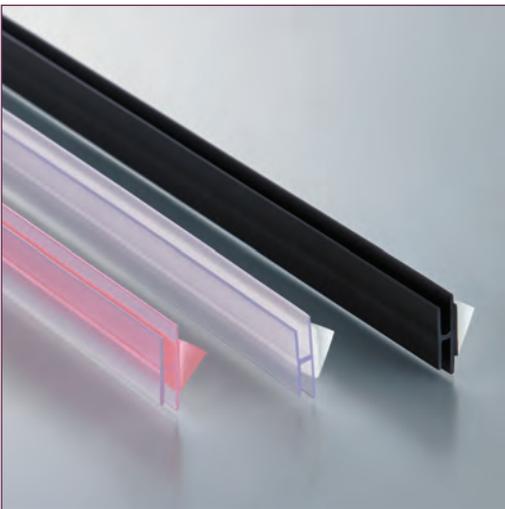

jc series sign grip

The JC series sign grips hold material up to 1/16" thick and mount securely to vertical surfaces with permanent peel-and-stick foam tape. These sign grips are made from water-clear PVC and, in the case of the JC-830, from extra-clear Provista™ material for a highly finished look.

- 13/16" mounting base x 5/8" front sign-grip lip — grips material up to 1/16"
- JC-820 features a thinner flex point at the bottom of the grip for easier sign insertion
- JC-840.040 features a more open pinch point or easier sign insertion
- the teardrop profile spreads to accept sign insertion
- the teardrop profile also grips tightly at the top to hold stock securely

item #	length	colors	tape style	material
JC-820-48	48"	clear	permanent white foam	PVC <i>UV resistant</i>
JC-830-48	48"	clear	permanent white foam	Provista
JC-840.040	48"	clear	permanent white foam	PVC <i>UV resistant</i>

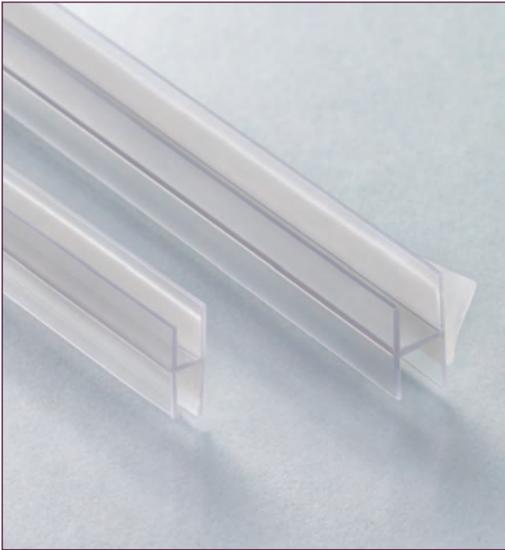

hc-50 series sign channels

The HC-50 series of sign channels holds material up to .065" thick and mounts securely to vertical surfaces with permanent peel-and-stick foam tape. This "H" channel works with the SC series "J" channels. The HC channel is used as a center piece, and the SC channel is used above and below the HC center.

- 5/8" mounting base x 7/16" front sign-grip lip — grips material up to .065"
- use as a center piece in combination with SC series sign channel
- the open "H" channel makes it easy to insert and reposition stock

item #	length	colors	tape style	material
HC-50-48	48"	clear	permanent white foam	PVC <i>UV resistant</i>
HC-51-48	48"	clear	permanent acrylic film	
HC-52-48	48"	clear	permanent black foam	

hc-series sign channels

The HC series sign channels hold materials from 1/8" to 1/4" thick. These channels mount securely to vertical surfaces with permanent peel-and-stick foam tape. They work with JC-series J-channels — an H-channel is used as a center point, and J-channels are used above and below HC center.

- HC-125: 5/8" back with tape x 7/16" front
- HC-250: 3/4" back with tape x 1/2" front
- HC-125 is used with JC-125 sign channels
- HC-250 is used with JC-125 sign channels
- both HC-series channels feature white, permanent, foam tape

item #	length	material capacity	colors	material
HC-125-48	48"	up to 1/8" thick	clear	PVC UV resistant
HC-250-48	48"	up to 1/4" thick	clear	

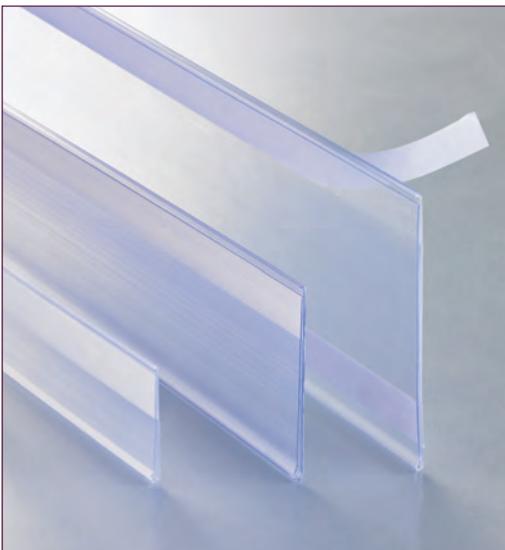

upc data rails series 1

UPC data rails adhere to shelving with peel-and-stick permanent foam tape and create a channel for inserting UPC price strips. A tall front face protects the inserted strip and the UPC code can be scanned through clear face. The 1-1/4" stock size matches standard insert strips.

- in three heights: 1.25", 2" and 3"
- simple inserting of your strips makes frequent product or price changes easy
- UPC strips can be scanned directly through the clear front face
- all series 1 upc data rails feature white, permanent, foam tape
- UPC-3-48, the 3" version, uses two strips of foam tape

item #	length	material capacity	colors	material
UPC-1.25-48	48"	up to 1-1/4" high	clear	PVC UV resistant
UPC-2-48	48"	up to 2" high	clear	
UPC-3-48	48"	up to 3" high	clear	

upc data rails series 2

Popco's competitively priced, imported, UPC data rails adhere to shelving with peel-and-stick permanent film tape and create a channel for inserting UPC price strips. A tall front face protects the inserted strip and a UPC code can be scanned through clear face.

- in three heights: 1.25", 2" and 3"
- easy inserting of your strips makes frequent product or price changes easy
- UPC strips can be scanned directly through the clear front face
- all series 2 upc data rails feature 1/2" high-tack clear film tape
- UPC-300-48F, the 3" version, uses two strips of film tape

item #	length	material capacity	colors	material
UPC-130-48F	48"	up to 1-1/4" high	clear	PVC UV resistant
UPC-200-48F	48"	up to 2" high	clear

c-channels

C-Channels adhere to shelving with peel-and-stick permanent foam tape and create a channel for inserting price and feature strips. Our 1-1/4" stock size matches standard insert strips. Other sizes are available as custom runs, as are a variety of materials and colors.

- 1-3/8" height with 1/8" front lips on the top and bottom
- clear and white styles feature white, permanent, foam tape
- the black style features black, permanent, foam tape
- simple inserting of your strips makes frequent product or price changes easy
- the 1-1/4" height matches standard insert strips

item #	length	material capacity	colors	materials
C-PVC-125-48B	48"	1-1/4" high	black	PVC
C-PVC-125-48C	48"	1-1/4" high	clear	UV resistant
C-PVC-125-48W	48"	1-1/4" high	white	in clear

foam-board edge protector

Popco's foam-board edge-protector fits over 3/16" and 1/4" foam board and protects the foam board from denting and dog-ears. The edge-protector is available in six stock lengths as well as an extra-long 146" length which can be cut to your specifications.

- 5/8" tall in six stock lengths
- use at the top and bottom of a foam board display to protect the four corners
- use on all sides of a foam board display for complete edge protection
- right angle cutting available — miter cutting is not offered

item #	length	colors	material
EDP-22	22"	clear	PVC
EDP-24	24"	black	co-extrusion

EDP-48	48"		
EDP-72	72"		

poster channels for magnetic boot

Use the poster channels, in combination with the matching magnetic sign boots, to mount signs to metal surfaces. Signs can be held in either a horizontal or vertical format. Sign change-out is fast and easy and the poster channels and magnetic boots can be reused many times over.

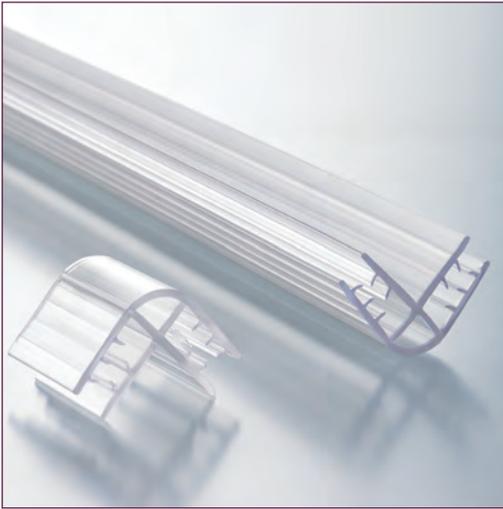

- hold materials .010" to .125" thick
- mount signs to steel gondola tops, warehouse-style merchandising racks, heavy wire racks and cooler tops
- combine with magnetic sign-base boots (page 22)

item #	length	colors	material
MSR-12C	12"	clear	PVC
MSR-18C	18"		UV resistant
MSR-24C	24"		in clear

display construction channels

With Popco's display construction channels, you can assemble right angles, variable angles, T-shaped or X-shaped constructions out of rigid materials. Join

coroplast, styrene, gator board, or acrylic together to assemble displays, and dump bins. The panels can then be held upright with our heavy-duty sign bases.

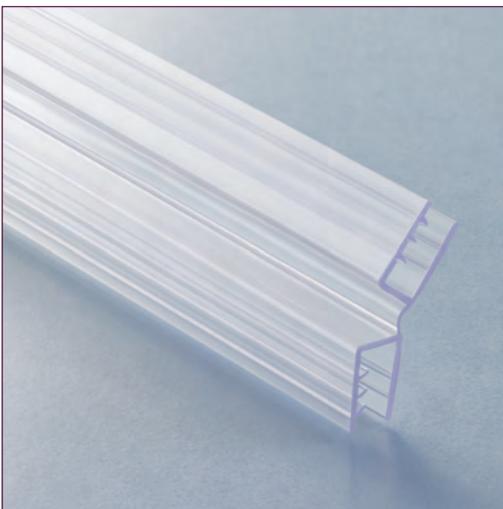

90 degree corner former

With the FDC series corner formers, coroplast sheets, gator board and other rigid materials can be joined together to create displays and dump bins. Also, with the corner formers, acrylic sheets can be connected to create covid barriers.

- FDC-125-1 – 1" wide x 1" high x 1" long
- FDC-125-49 – 1" wide x 1" high x 49" long
- join thick stocks together creating displays and dump bins
- flexible, finned grips hold rigid stocks firmly in place
- custom lengths can be cut from 49" stock

item #	length	material capacity	colors	material
FDC-125-1	1"	.125" to .1875" thick	clear	PVC UV resistant
FDC-125-49	49"	.125" to .1875" thick	clear	

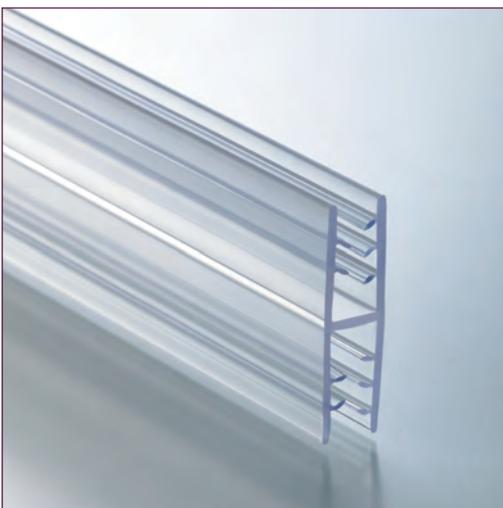

living hinge corner former

With the FDLH "living-hinge" series panel formers, coroplast sheets, gator board and other rigid materials can be joined together to create displays and dump bins. A flexible center point on the corner formers allows constructions to form angles and conform to varied shapes.

- FDLH-125-48 – 3/8" wide x 1-1/2" high x 48" long
- FDLH-250-48 – 7/16" wide x 1-9/16" high x 48" long
- flexible center point allows for positioning at nearly any angle
- flexible finned grips hold rigid stocks firmly in place
- custom lengths can be cut from 48" stock

item #	length	material capacity	colors	material
FDLH-125-48	48"	.125" to .1875" thick	clear	PVC UV resistant
FDLH-250-48	48"	.1875" to .250" thick	clear	

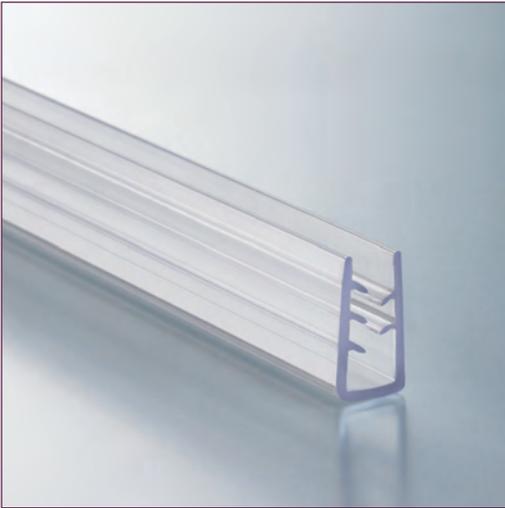

h-channel panel connector

With the FDHC H-channel panel connectors, coroplast sheets, gator board and other rigid materials can be joined together to create displays. Also, with the panel connectors, acrylic sheets can be connected to create covid barriers.

- FDHC-125-48 – 3/8" wide x 1-5/16" high x 48" long
- FDHC-250-48 – 1/2" wide x 1-5/16" high x 48" long
- join thick stocks together creating displays and dump bins
- flexible, finned grips hold rigid stocks firmly in place
- custom lengths can be cut from 48" stock

item #	length	material capacity	colors	material
FDHC-125-48	48"	.125" to .1875" thick	clear	PVC UV resistant
FDHC-250-48	48"	.1875" to .250" thick	clear	

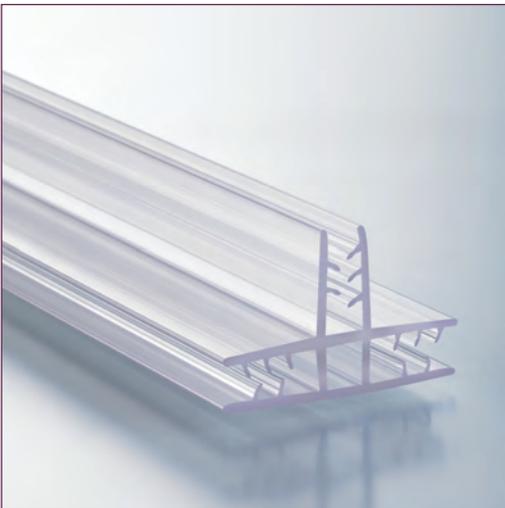

u-channel panel end cap

The FDUC series end caps protect the edges of coroplast sheets, gator board and other rigid materials used in displays. These end caps complement Popco's other display-construction panel formers.

- FDUC-125-48 – 3/8" wide x 5/8" high x 48" long
- FDUC-250-48 – 7/16" wide x 11/16" high x 48" long
- flexible, finned grips hold rigid stocks firmly in place
- custom lengths can be cut from 48" stock

item #	length	material capacity	colors	material
FDUC-125-48	48"	.125" to .1875" thick	clear	PVC <i>UV resistant</i>
FDUC-250-48	48"	.1875" to .250" thick	clear	

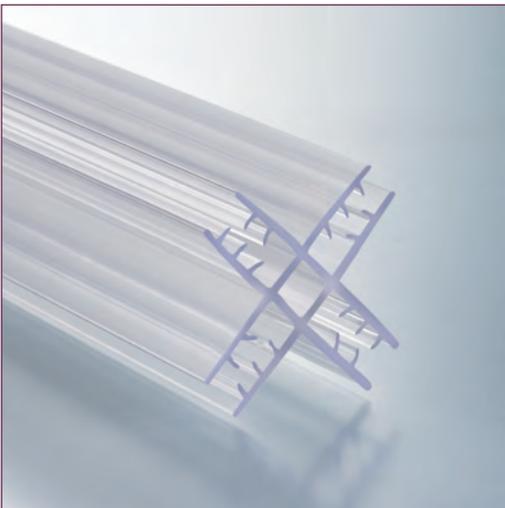

t-bracket panel connector

The 3-way FDTB panel connectors create a t-shaped joining point for displays made from coroplast sheets, gator board and other rigid materials. Also, with the t-bracket connectors, acrylic sheets can be connected to create covid barriers.

- 1-5/8" wide x 1" high x 49" long
- join thick stocks together creating displays
- flexible, finned grips hold rigid stocks firmly in place
- custom lengths can be cut from 49" stock

item #	length	material capacity	colors	material
FDTB-125-49	49"	.125" to .1875" thick	clear	PVC <i>UV resistant</i>

4-way panel connector

The FDPC 4-way panel formers create a center spine for displays made from coroplast sheets, gator board and other rigid materials. Also, with the panel formers, acrylic sheets can be connected to create covid barriers.

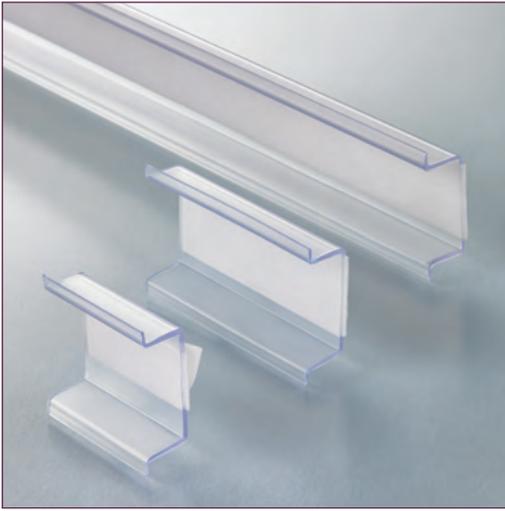

- 1-5/8" x 1-5/8" x 49"
- join thick stocks together creating displays
- flexible, finned grips hold rigid stocks firmly in place
- custom lengths can be cut from 49" stock

item #	length	material capacity	colors	material
FDPC-125-49	49"	.125" to .1875" thick	clear	PVC <i>UV resistant</i>

small sign fasteners

Small sign fasteners can affix to displays or store shelves with foam tape. Or, they can clip into shelf channels using no tape for easy repositioning and reuse.

Popco fasteners hold small signs either flush to a surface, or at right angles. Signs adhere to our fasteners with tape, a pinch-grip, or with self-piercing tabs.

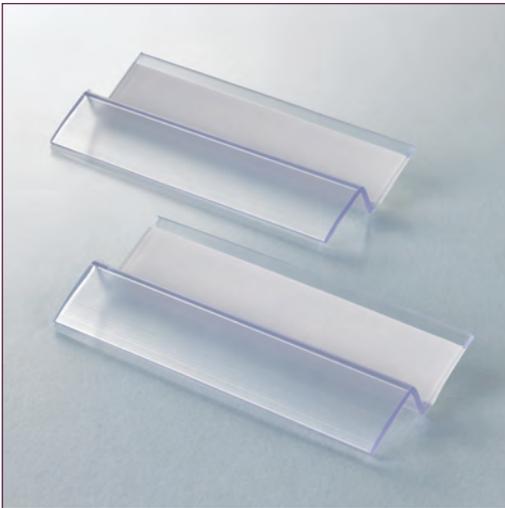

shelf-edge adapters

The shelf-edge adapter snaps into 1-1/4" self-edge channels and grips your sign with peel-and-stick permanent foam tape. The shelf-edge adapter slides back and forth in the price channel allowing for quick sign positioning.

- 1-1/4" wide x 1/2" high, in lengths ranging from 1-1/4" to 49"
- mount signs in standard 1-1/4" self-edge channels
- flexible sides pinch towards each other for easy insertion into self-edge channels
- peel and stick foam tape makes sign mounting fast and secure
- custom lengths can be cut from 49" stock

item #	length	tape size	color	materials
SEA-125	1-1/4"	1/2" wide - 1/32" thick	clear	PVC <i>UV resistant</i> permanent white foam tape
SEA-2	2"	3/4" wide - 1/32" thick		
SEA-49	49"	3/4" wide - 1/32" thick		

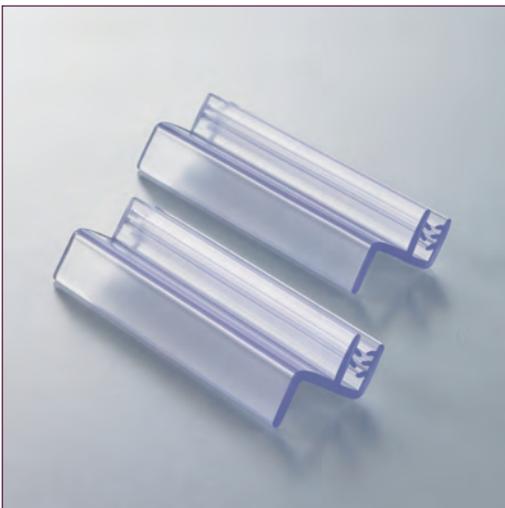

slatwall clip standard

slatwall clips hold lightweight signs to slatwalls. Peel-and-stick foam tape grips the sign, and positioning the sign is as easy as sliding it back and forth in the slatwall.

- .605" high slat-grip and .75" high sign-mount area with foam tape
- stock lengths: 3" and 49"
- insert the clip into standard slatwall and mount signs with peel-and-stick foam tape
- custom lengths can be cut from 49" stock

item #	length	tape size	color	materials
ZB-3LT	3"	1/2" wide	clear	PVC <i>UV resistant</i> permanent white foam tape
ZB-49LT	49"	1/32" thick		

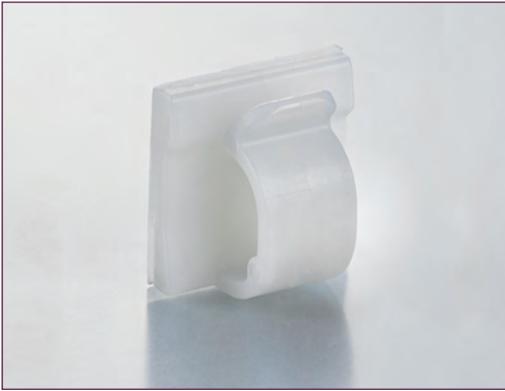

slatwall clip finned

Finned slatwall clips hold lightweight, rigid signs to slatwalls. The flexible sign-gripping fins hold signs securely without the need for tape, making this part reusable many times over. With finned slatwall clips, positioning signs is as easy as sliding them back and forth in the slatwall.

- 7/16" high slat-grip and 7/16" high sign-mount area
- stock lengths: 3" and 49"
- insert the clip into standard slatwall and grip signs with flexible sign-grip fins
- custom lengths can be cut from 49" stock

item #	length	material capacity	color	materials
ZBF-3	3"	1/32" to 1/16"	clear	PVC <i>UV resistant</i>
ZBF-49	49"			

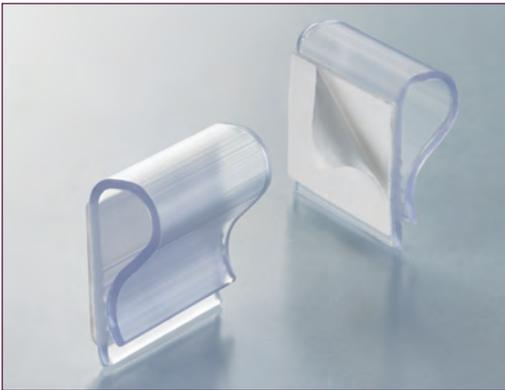

pen clip

Pen clips hold pens and markers with diameters up to 3/8" to smooth surfaces using peel-and-stick foam tape. The flexible front piece makes inserting and removing the pen easy.

- a flared lip on pen clip's top makes inserting pens & markers easy
- ideal for dry-erase boards and guest books

item #	dimensions	colors	materials
PN-1W	3/4" square base .464" high	white	PVC permanent white foam tape

r-clip

R-clips adhere signs to wire racks. The curved front clip grips the rack, and peel-and-stick foam tape on the clip's base holds signs in place. R-clips can also mount to most surfaces using the tape, then, the curved front clip grips signs and holds them in place.

- 1" deep base x 13/32" high in lengths from 1" to 49"
- a flared lip on the r-clip's gripping area makes affixing to racks and displays easy

item #	length	colors	materials
RR-1C	1"	clear	PVC <i>UV resistant</i>
RR-49C	49"		permanent white foam tape

shelf push pin 1

Shelf push pins fasten printed materials and merchandising items onto perforated metal store shelves. The tapered pins pass through your materials and insert into shelf holes. They then spread open, gripping the shelf and holding your materials in place.

- grips materials up to .095" thick
- fits both diamond-shaped and round 1/4" holes

item #	dimensions	colors	materials
SPP-316N	1/2" long 3/8" diameter head	clear (natural)	polypropylene

shelf push pin 2

Shelf push pins fasten printed materials and merchandising items onto perforated metal store shelves. The tapered pins pass through your materials and insert into shelf holes. They then spread open, gripping the shelf and holding your materials in place.

- grips materials up to .10" thick
- fits both diamond-shaped and round 1/4" holes

item #	dimensions	colors	materials
SPP-289	1/2" long 3/8" diameter head	white	polypropylene

small sign fasteners

canoe clip

Canoe clips are fasteners that insert into 1/4" holes for secure, long-term sign display. The clips can be removed and reused occasionally, but their extra-secure grip is best suited for displays that are not often changed.

- use in 1/4" holes for long-term signs and displays
- binds materials up to 1/4" thick
- ideal for pegboard and store shelving with 1/4" perforated holes
- also functions as a push-fastener for assembly of displays and bins

item #	dimensions	colors	material
CC-25B	11/16" long	black	polypropylene
CC-25N	9/16" dia. head	natural	

dart clip

Dart clips insert into 1/4" holes in sign and display materials as well as in pegboard and store shelving. The clips grip securely and yet are more easily removed for sign changes than the similar product, canoe clips.

- use in 1/4" holes for signs and displays
- binds materials up to 1/4" thick
- ideal for pegboard and store shelving with 1/4" perforated holes
- also functions as a push-fastener for assembly of displays and bins

item #	dimensions	colors	material
DC-2B	11/16" long	black	polypropylene
DC-1C	15/32" dia. head	clear	
DC-1N		natural	

ad pad clip

Ad pad clips snap into 1-1/4" price rails and have a shaft, at a right angle to the price rail, from which take-one pads or signs can be hung. Your printed material requires a 1/4" hole to fit over the clip's shaft. The flexible, arrow-head shape of the shaft holds printed materials in place.

- 3/4" long shaft, with flexible arrow-head, holds pads or signs up to 7/16" thick
- without tape, positioning is as easy as sliding back and forth in a price rail
- with foam tape on the base, ad pad clips can be affixed to any smooth surface

item #	dimensions	tape style	colors	material
ADC-1	7/16" wide base	no tape	natural	polypropylene
ADC-2	1-1/4" long	permanent		1/32" white foam tape

self-piercing mirror sign-holder

The self-piercing mirror sign-holder snaps into the 1-1/4" front-channel of standard retail shelves and holds small signs in place by piercing the sign stock with a small tab. That tab then locks into a corresponding hole. This part hold signs in a mirror position (flush to shelves).

- in the closed position, the 1-1/4" height corresponds to retail shelf channels
- the flexible face of the part closes easily piercing sign stock or opens to change signs
- pierces stocks up to 12 point (0.012") thick
- without tape, positioning is as easy as sliding back and forth in the shelf channel
- long lasting and reusable

item #	dimensions	colors	material
CMH-2T	1-1/8" wide x 1-1/4" high <i>closed</i> 3/8" deep <i>from back of shelf channel</i>	natural	polypropylene

self-piercing flag sign-holder

The self-piercing flag sign-holder snaps into the 1-1/4" front-channel of standard retail shelves and holds small signs in place by piercing the sign stock with a small tab. That tab then locks into a corresponding hole. This part hold signs in a flag position (at a right angle to shelves).

- in the closed position, the 1-1/4" height corresponds to retail shelf channels
- the flexible face of the part closes easily piercing sign stock or opens to change signs
- pierces stocks up to 12 point (0.012") thick
- without tape, positioning is as easy as sliding back and forth in the shelf channel
- long lasting and reusable

item #	dimensions	colors	material
CFH-1T	3/4" wide x 1-1/4" high <i>closed</i> 7/8" deep <i>from back of shelf channel</i>	natural	polypropylene 1/32" white foam tape

3-way mirror/flag sign holder

This shelf-channel sign-holder snaps into the 1-1/4" front-channel of standard retail shelves and holds small signs in place with two integral gripping tabs, or with the right-angle sign-holding slot. No tape is required, making the SEC-1T reusable and ideal for frequently changing promotions.

- signs can be positioned in a mirror position above or below the store shelf deck
- signs can be positioned in a flag position (at a right angle to the store shelf)
- accepts stocks up to 14 point (0.014") thick
- without tape, positioning is as easy as sliding back and forth in the shelf channel
- long lasting and reusable

item #	dimensions	colors	material
SEC-1T	1" wide x 1-1/4" high 3/4" deep <i>from back of shelf channel</i>	natural	polypropylene

finned-grip sign holders

Popco's finned-grip sign holders affix to displays or shelves with tape. Or, they mount in shelf channels using no tape. These parts then hold your small signs; either flush to a

surface, or at right angles. Flexible fins grip signs and accept a variety of stock thicknesses. Once in place, just slip your sign into the holder's channel and you're all set.

slatwall clip finned

Finned slatwall clips hold lightweight signs to slatwalls. Flexible sign-gripping fins hold signs securely without the need for tape, making this part reusable. Positioning signs is as easy as sliding them back and forth in the slatwall.

- 7/16" high slat-grip and 7/16" high sign-mount — in 3" and 49" widths
- custom lengths can be cut from 49" stock
- flexible, finned grips hold rigid stocks up to 16 point (0.016") thick

item #	dimensions	colors	material
ZBF-3	3" wide x 7/8" high x 3/4" deep	clear	PVC
ZBF-49	49" wide x 7/8" high x 3/4" deep		UV resistant

finned edge-clip

When attached to store shelving or displays, the finned edge-clip provides a grip for holding signs in a flag position (at a right angle to the mounting surface). No tape is required, making this part long lasting and reusable.

- mount two-sided signs to product shelving and displays
- grips shelves up to 13 gauge thick
- flexible, finned grips hold rigid stocks up to .080" thick

item #	dimensions	colors	material
PR64-075	7/8" wide x 1-3/4" high x 3/4" deep 11/16" high x 1/2" deep sign grip	clear	PVC UV resistant

finned price-rail flag

The finned price-rail flag snaps into the 1-1/4" front-channel of standard retail shelves and holds small signs in a flag position (at a right angle to the shelf). No tape is required, making this part long lasting and reusable.

- mount two-sided signs to standard retail shelves
- positioning is as easy as sliding back and forth in the shelf channel
- flexible, finned grips hold rigid stocks up to .080" thick

item #	dimensions	colors	material
PR14-075	3/4" wide x 1-1/4" high x 7/8" deep 3/4" high x 1/2" deep sign grip	clear	PVC UV resistant

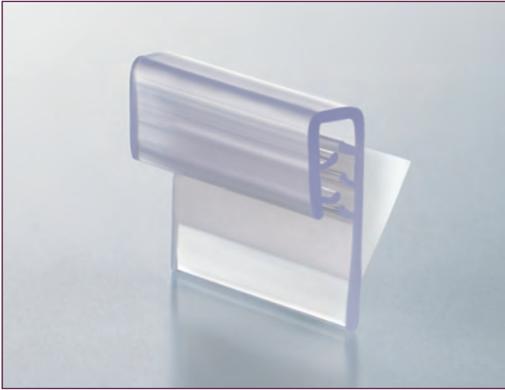

finned price-rail sign holder

The finned price-rail sign holder snaps into the 1-1/4" front-channel of standard retail shelves and holds small signs in a mirror position (flush to the shelf). No tape is required, making this part long lasting and reusable.

- mount single-sided signs to standard retail shelves
- positioning is as easy as sliding back and forth in the shelf channel
- flexible, finned grips hold rigid stocks up to .080" thick

item #	dimensions	colors	material
PR12-050	1/2" wide x 1-1/4" high x 3/4" deep	clear	PVC
PR12-100	1" wide x 1-1/4" high x 3/4" deep		UV resistant

finned-grip sign holders

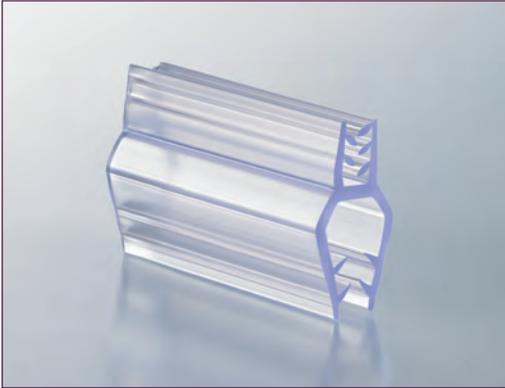

finned j-channel

The finned j-channels, with permanent foam tape, mount to shelves, signs, or any smooth vertical surface and grip signs parallel to the surface. These parts, also known as kudaclips, hold sign material up to .080" thick.

- available in 1" and 3" lengths
- affixes to nearly any surface with permanent foam tape
- flexible, finned grips hold rigid stocks up to .080" thick

item #	dimensions	tape style	colors	materials
FJC-103-1	1" wide x .815" high x 1/4" deep	permanent	clear	PVC <i>UV resistant</i>
FJC-103-3	3" wide x .815" high x 1/4" deep	permanent		white foam tape

finned saddle clip

With the finned saddle clip, multiple sign panels can be joined together. The large bottom of the "saddle" holds material up to .187" or thinner, the smaller top holds material up to .080" or thinner. The gripping fins, inside both the top and bottom saddles, hold sign material securely.

- attach cards, call-outs, or "snipes" to thicker sign stock
- large bottom holds stock up to .187" — small top holds stock up to .080"

item #	dimensions	colors	materials
FSD16-150	1-1/2" wide x 1" high x 1/2" deep	clear	PVC <i>UV resistant</i>

wire basket-clip single

The wire basket-clip (single) hangs over basket frames and grips signs, holding them parallel to the basket surface (mirror position). No tape is required, making this part long lasting and reusable.

- support small signs with one wire basket-clip single
- for larger signs, use several wire basket-clip singles
- flexible, finned grips, hold rigid stocks up to .080" thick
- inside loop dimension is 3/8"

item #	dimensions	colors	materials
FWB-305-.5	1/2" wide x 7/8" high x 3/4" deep	clear	PVC <i>UV resistant</i>

wire basket-clip double

The wire basket-clip (double) hangs over basket frames and grips signs, holding them parallel to the basket surface (mirror position). No tape is required, making this part long lasting and reusable.

- support small and medium-sized signs
- flexible, finned grips hold rigid stocks up to .080" thick
- inside loop dimension is 3/8"

item #	dimensions	colors	materials
FWB-305-1.5	1-3/8" wide x 1-5/8" high x 5/8" deep	clear	PVC <i>UV resistant</i>

binding posts & screws

Binding posts and screws are used to create sample books, reports and presentations. They are also used to bind display panels together. When reuse is important, like

updating sample-book pages, threaded aluminum “Chicago” screws are ideal. When fast, hand-assembly is needed, plastic, press-rivet-like, post and screws are perfect.

for rapid push-together assembly, no tools or threading required

clear post & screws

Clear, push-lock, posts and screws are meant for rapid assembly of swatch books, brochures or nearly any material that needs to be bound together. The posts and screws grip and hold simply by being pushed together; threading is not required.

overview

- bind together materials from approximately 1/8" to 1"
- ideal for swatch books, brochures, corporate and legal reports
- use for quick, strong, assembly of corrugated displays
- affix signs or sub-components to point-of-purchase displays

specs

- small-head styles feature 3/8" diameter heads
- large-head styles feature 17/32" diameter heads
- posts (the female part) feature a .24" outside diameter
- screws (the male part) feature a 10-32 thread size
- posts are not threaded
- posts have a raised ridge inside the barrel that holds the screws
- posts and screws are available with either slotted or unslotted heads
- posts and screws are made from extra-clear resin

usage tips

- print and display materials require 9/32" holes to accept posts
- unslotted styles are not intended for removal
- slotted styles work for limited removal and reuse
- for semi-permanent and permanent projects, removal of the posts and screws is difficult

3/8" small-head styles

- SPLU series with unslotted-head posts and screws
- SPLS/U series with combined unslotted & slotted heads

large-head style

black post & screws

Black posts and screws are available in two head sizes and a number of shaft lengths. They are ideal for rapid assembly of swatch books, brochures or nearly any material that needs to be bound together. The posts and screws grip and hold simply by being pushed together, no tools are needed and threading is not required. These parts are Sara III compliant (containing no prohibited chemicals or heavy metals).

overview

- bind together materials from approximately 1/8" to 2"
- ideal for swatch books, brochures, corporate and legal reports
- use for quick, strong, assembly of corrugated displays
- affix signs or sub-components to point-of-purchase displays

specs

- small-head styles feature 3/8" diameter heads

pegex.com/sara-title-iii-and-managing-your-hazardous-waste/

binding posts & screws

zero-caps

Zero-cap and push-lock screw sets function like our other binding posts, but are capable of binding together very thin printed materials. The open, washer-like cap grips a corresponding screw just as our binding posts do.

- for semi-permanent and permanent projects, removal of the zero-cap is difficult
- the 3/16" screw and zero-cap set binds materials from 0.020" to 0.060" thick
- the 1/4" screw and zero-cap set binds materials from 0.060" to 0.100" thick
- small-head style features 3/8" diameter head
- large-head style features 17/32" diameter head
- made from extra-clear resin

CLEAR zero caps item #	screw length	screw head	WHITE zero caps item #	screw length	screw head

MPLU/Z-250 SETC	1/4"	large	MPLU/Z-250 SETW	1/4"	large

loop screws

Push-lock loop-screws function just like standard push-lock screws, but feature an open loop on the screw head. The loop allows for the attachment of beaded chain for use with swatch books. The loop-screws also create hanging points and work with wire hooks and other hanging hardware for light signs.

- head diameter 17/32" (.53" or 13.5 mm)
- loop .21" (5.46 mm) wide x .105" (2.67 mm) tall
- for 1/4" diameter holes — 3/16" to 1" binding capacity

aluminum post & screws

Aluminum screw posts, also known as Chicago screws, are ideal for binding swatch books, brochures and menus. The aluminum finish makes these post and screw sets well suited for upscale projects.

- 13/64" shaft diameter, with 3/8" diameter slotted heads
- 8-32 thread size (screw assembly only) — 1/8" to 1" binding capacity

item #	post length	screw length	post head	screw head

display fasteners

With Popco's display fasteners, P.O.P. displays, end-cap constructions and dump bins can be joined together quickly and without tools. Our fasteners press into

your constructions and hold tightly, either with finned grips like our X-mas tree clips, or with a cap-and-shaft arrangement like viking-hat and flat-cap fasteners.

viking hat screws

Viking hat screws are quick-assembly fasteners that push together to close and unscrew to remove. Available in five lengths, the viking hat screws will fasten together materials ranging from approximately 3/8" to 1-3/4".

overview

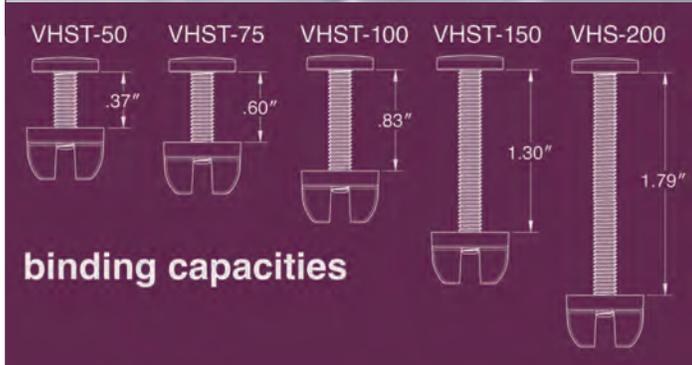

- use for quick, secure, hand assembly of P.O.P. displays
- no tools are required, simply push the head and shaft together
- unbind materials and reuse by unscrewing the wingnut

specs

- 0.187" (4.77 mm) shaft diameter
- 0.537" (13.5 mm) head and wing nut diameter
- the wingnut is molded to the shaft and snaps off for use

usage tips

- for a clean, flush look, assemble displays with the snap-off viking-hat on the backside of the panels being assembled

x-mas tree clips

X-mas tree clips are inserted through 1/4" holes and bind together materials from 3/16" to 9/16" thick. The clips also bind printed materials to 1/4" holes in store shelving or on displays.

- grip display materials to 1/4" holes in store shelving
- use to join panels on P.O.P. displays and product dump bins
- gripping fins on the clip's shaft help bind materials tightly

binding capacities

flat cap fasteners

Flat cap screws are quick-assembly fasteners that push together to close and, though removable, offer a more permanent bond than the similar viking hat screws. Available in four lengths, the flat cap screws will fasten together materials ranging from approximately 3/8" to 1-3/8".

overview

- use for quick, secure, hand assembly of P.O.P. displays
- no tools are required, simply push the head and shaft together

specs

- 0.187" (4.77 mm) shaft diameter
- 0.537" (13.5 mm) head and flat cap diameter
- the flat cap is molded to the shaft and snaps off for use

usage tips

- for a clean, flush look, assemble displays with the snap-off flat cap on the backside of the panels being assembled

item #	length	ring style	capacity	material

honeycomb screws

With Popco's new honeycomb screws, product bins and P.O.P. displays can be assembled out of fluted corrugated stock and honeycomb board. These materials are known for their strength and light weight and the honeycomb screws are a perfect assembly option when using them.

- available in two lengths to accommodate various thicknesses of corrugated and honeycomb board stock
- made from strong, extra-clear, polycarbonate
- featuring a sharp, self-tapping tip — depending on the board surface, pilot holes may not be necessary
- featuring a phillips head for screwdriver assembly

HCS55-14	2-1/4"			

suction cups

Popco has an extensive selection of suction cups, with and without sign holders and hooks. Some of our suction cups are coupled with screws or tacks, giving users

even more options for affixing and displaying signs. For small suction cups, meant for POP signage, you won't find a more complete product line up than Popco's.

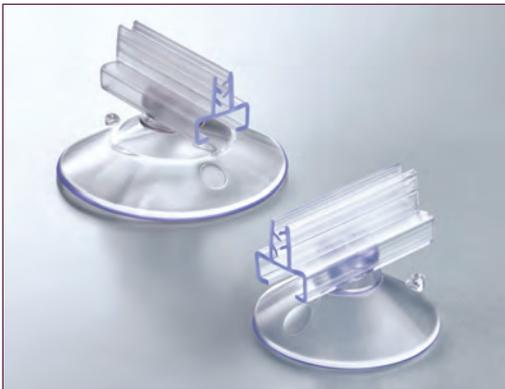

suction cup mirror clip

With the suction cup mirror clip, small and medium-sized signs can be held parallel (mirror position) to smooth, nonporous surfaces such as windows, cooler doors and deli cases.

- finned sign-grip holds rigid stock up to .070" thick
- sign change-out is fast and easy, ideal for repeat use
- sold in bags of 100

item #	dimensions	material
103121	suction cup: 1-3/4" dia. base mirror clip: 1-1/2" wide x 5/8" high x 1/2" deep	clear PVC UV resistant

suction cup flag clip

With the suction cup flag clip, small and medium-sized signs can be held at a right-angle (flag position) to smooth, nonporous surfaces such as windows, cooler doors and deli cases.

- finned sign-grip holds rigid stock up to .070" thick
- sign change-out is fast and easy, ideal for repeat use
- sold in bags of 100

item #	dimensions	material
103122	suction cup: 1-3/4" dia. base flag clip: 1-1/2" wide x 5/8" high x 5/8" deep	clear PVC UV resistant

small suction cup w/friction ring

The SCM-80 is Popco's smallest suction cup featuring a friction ring (a raised ring which encircles the suction cup's stem). Lightweight signs can be held between the base of the suction cup and the friction ring. The SCM-80 will adhere to nonporous surfaces such as glass.

- a 1/8" hole on the top of the stem accepts standard and nylon tacks
- pierce signs with the tacks and affix them to the suction cup

item #	dimensions	material
SCM-80	7/8" dia. base - 0.33" dia. head - 1/2" overall height 0.30" stem height	clear PVC UV resistant

small suction cup w/mushroom head

The SCM-81 is Popco's smallest suction cup featuring a mushroom head. Lightweight signs with a keyhole die-cut can be hung over the mushroom head. Signs can also be displayed by combining the suction cup with tacks. The SCM-81 will adhere to nonporous surfaces such as glass.

- a 1/8" hole on the top of the stem accepts standard and nylon tacks
- pierce signs with the tacks and affix them to the suction cup

item #	dimensions	material
SCM-81	7/8" dia. base - 0.30" dia. head - 0.45" overall height 0.21" overall stem height - 0.080" shaft height	clear PVC UV resistant

small suction cup w/mushroom head

The SCM-118 is a small suction cup featuring a mushroom head. Lightweight signs with a keyhole die-cut can be hung over the mushroom head. Signs can also be displayed by combining the suction cup with tacks. The SCM-118 will adhere to nonporous surfaces such as glass.

- a 1/8" hole on the top of the stem accepts standard and nylon tacks
- pierce signs with the tacks and affix them to the suction cup

item #	dimensions	material
SCM-118	1-3/16" dia. base - 0.30" dia. head - 1/2" overall height 0.29" overall stem height - 0.12" shaft height	clear PVC <i>UV resistant</i>

suction cup w/mushroom head

The SCM-177 is a medium-sized suction cup featuring a mushroom head. Signs with a keyhole die-cut can be hung over the mushroom head. Signs can also be displayed by combining the suction cup with tacks. The SCM-177 will adhere to nonporous surfaces such as glass.

- a 1/8" hole on the top of the stem accepts standard and nylon tacks
- pierce signs with the tacks and affix them to the suction cup

item #	dimensions	material
SCM-177	1-3/4" dia. base - 0.57" dia. head - 0.70" overall height 3/8" overall stem height - 0.16" shaft height	clear PVC <i>UV resistant</i>

suction cup w/friction ring

The SC-187 is a medium-sized suction cup featuring a friction ring (a raised ring which encircles the suction cup's stem). Signs can be held between the base of the suction cup and the friction ring. The SC-187 will adhere to nonporous surfaces such as glass.

- a 1/8" hole on the top of the stem accepts standard and nylon tacks
- pierce signs with the tacks and affix them to the suction cup

item #	dimensions	material
SC-187	1-7/8" dia. base - 0.46" dia. head - 7/8" overall height 0.325" stem height	clear PVC <i>UV resistant</i>

large suction cup w/mushroom head

The SCM-240 is Popco's largest suction cup featuring a mushroom head. Signs with a keyhole die-cut can be hung over the mushroom head. Signs can also be displayed by combining the suction cup with tacks. The SCM-240 will adhere to nonporous surfaces such as glass.

- a 1/8" hole on the top of the stem accepts standard and nylon tacks
- pierce signs with the tacks and affix them to the suction cup

item #	dimensions	material
SCM-240	2.4" dia. base - 0.57" dia. head - 0.90" overall height 3/8" overall stem height - 0.16" shaft height	clear PVC <i>UV resistant</i>

suction cups

suction cup w/medium hole

The SCMH-187 is a medium-sized suction cup featuring a friction ring (a raised ring which encircles the suction cup's stem). This suction cup has a 0.16" stem hole that expands to accept inserts up to 3/16" in diameter. The SCMH-187 will adhere to nonporous surfaces such as glass.

- a 0.16" hole on the top of the stem accepts inserts up to 3/16"
- combine with screws or inserts to display signs

item #	dimensions	material
SCMH-187	1-7/8" dia. base - 0.46" dia. head - 7/8" overall height 0.325" stem height	clear PVC <i>UV resistant</i>

suction cup w/1/4" hole

The SCQH-187 is a medium-sized suction cup featuring a friction ring (a raised ring which encircles the suction cup's stem). This suction cup has a 1/4" stem hole that accepts inserts up to 1/4" in diameter, such as split-tube sign holders. The SCQH-187 will adhere to nonporous surfaces such as glass.

- a 1/4" hole on the top of the stem accepts inserts up to 1/4"
- combine with 1/4" split tubes to display signs

item #	dimensions	material
SCQH-187	1-7/8" dia. base - 0.46" dia. head - 7/8" overall height 0.325" stem height	clear PVC <i>UV resistant</i>

suction cup w/wire hook

The SCH-177 is a medium-sized, mushroom-head style, suction cup with an attached a wire hook. Signs, pre-drilled with a 3/32" hole, can be displayed in a mirror position (flush to the surface that the suction cup is applied to). The SCH-177 will adhere to nonporous surfaces such as glass.

- a 1/16" diameter metal hook extends 7/8" down and 5/8" out from the suction cup stem

item #	dimensions	material
SCH-177	1-3/4" dia. base - 0.57" dia. head - 0.70" overall height 3/8" overall stem height - 0.16" shaft height	clear PVC <i>UV resistant</i>

large suction cup w/wire hook

The SCH-240 is Popco's largest, mushroom-head style, suction cup with an attached a wire hook. Signs, pre-drilled with a 3/32" hole, can be displayed in a mirror position (flush to the surface that the suction cup is applied to). The SCH-240 will adhere to nonporous surfaces such as glass.

- a 1/16" diameter metal hook extends 7/8" down and 5/8" out from the suction cup stem

item #	dimensions	material
SCH-240	2.4" dia. base - 0.57" dia. head - 0.90" overall height 3/8" overall stem height - 0.16" shaft height	clear PVC <i>UV resistant</i>

suction cups

small suction cup w/clear tack

The SCMT-80 is Popco's smallest suction cup coupled with a clear tack. The tack pierces sign stock, or passes through drilled or punched holes. It then grips the corresponding hole in the suction cup's stem holding signs in place.

- pierce small signs and affix to the suction cup
- adhere the suction cup to nonporous surfaces such as glass
- suction cups and tacks are sold bulk, bagged separately

item #	dimensions	materials
SCMT-80	suction cup: 7/8" dia. base tack: 0.675" dia. head - 0.32" high	suction cup: clear PVC tack: extra-clear resin

suction cup w/clear tack

The SCT-187 is a medium-sized suction cup coupled with a clear tack. The tack pierces sign stock, or passes through drilled or punched holes. It then grips the corresponding hole in the suction cup's stem holding signs in place.

- pierce signs and affix to the suction cup
- adhere the suction cup to nonporous surfaces such as glass
- suction cups and tacks are sold bulk, bagged separately

item #	dimensions	materials
SCT-187	suction cup: 1-7/8" dia. base tack: 0.675" dia. head - 0.32" high	suction cup: clear PVC tack: extra-clear resin

large suction cup w/clear tack

The SCT-240 is Popco's largest suction cup coupled with a clear tack. The tack pierces sign stock, or passes through drilled or punched holes. It then grips the corresponding hole in the suction cup's stem holding signs in place.

- pierce signs and affix to the suction cup
- adhere the suction cup to nonporous surfaces such as glass
- suction cups and tacks are sold bulk, bagged separately

item #	dimensions	materials
SCT-240	suction cup: 2.4" dia. base tack: 0.675" dia. head - 0.32" high	suction cup: clear PVC tack: extra-clear resin

small suction cup w/nylon tack

The SCNT-118 is a small suction cup coupled with a nylon tack. The tack passes through drilled or punched holes in small signs. It then grips the corresponding hole in the suction cup's stem holding signs in place.

- affix signs to the suction cup with the barbed tack for an extra secure grip
- adhere the suction cup to nonporous surfaces such as glass
- suction cups and tacks are sold bulk, bagged separately

item #	dimensions	materials
SCNT-118	suction cup: 1-3/16" dia. base tack: 0.615" dia. head - 0.32" high	suction cup: clear PVC tack: natural nylon

suction cups

suction cup w/nylon tack

The SCNT-187 is a medium-sized suction cup coupled with a nylon secure tack. The tack passes through drilled or punched holes in small signs. It then grips the corresponding hole in the suction cup's stem holding signs in place.

- pierce signs and affix to the suction cup, the barbed tack provides a secure grip
- adhere the suction cup to nonporous surfaces such as glass
- suction cups and tacks are sold bulk, bagged separately

item #	dimensions	materials
SCNT-187	suction cup: 1-7/8" dia. base tack: 0.615" dia. head - 0.32" high	suction cup: clear PVC tack: natural nylon

suction cup w/slotted screw

The SCS-187 is a medium-sized suction cup with a larger hole in the stem than the standard 1/16" hole. The larger hole accommodates a 1/4" long plastic binding screw. The screw passes through drilled holes in signs. It then grips the hole in the suction cup's stem holding signs in place.

- adhere the suction cup to nonporous surfaces such as glass
- suction cups and screws are sold bulk, bagged separately

item #	dimensions	materials
SCS-187	suction cup: 1-7/8" dia. base screw: 0.53" dia. head - 1/4" shaft length	suction cup: clear PVC screw: Celcon® plastic

suction cup w/metal screw

The SCMS-187 is a medium-sized suction cup with a larger hole in the stem than the standard 1/16" hole. The larger hole accommodates a 1/2" long pan-head metal screw. The screw passes through drilled holes in signs. It then grips the hole in the suction cup's stem holding signs in place.

- adhere the suction cup to nonporous surfaces such as glass
- suction cups and screws are sold bulk, bagged separately

item #	dimensions	materials
SCMS-187	suction cup: 1-7/8" dia. base screw: 10/24 thread - 1/2" shaft length	suction cup: clear PVC screw: metal

suction cup w/nut & screw

The SCTN-2125 is a large-sized suction cup with a metal screw permanently fixed into the suction cup stem. A plastic nut is included with the suction cup and screw. The nut threads onto the screw to hold materials up to 3/16" thick.

- 3/16" hole size will accommodate the screw
- adhere the suction cup to nonporous surfaces such as glass
- suction cups with nuts and screws are sold assembled

item #	dimensions	materials
SCTN-2125	suction cup: 2-1/16" dia. base nut: 9/16" dia. shaft length	suction cup: clear PVC screw: metal

suction cups

suction cup w/deko spring

The SCDS-187 is a medium-sized suction cup with a 1/4" hole in the stem that accommodates Popco's "deko spring". The deko spring is a spring-mounted adhesive button. Removing the button's peel-and-stick liner allows small signs to easily mount to the button.

- 1" spring attached to an adhesive-backed button with permanent, white foam tape
- 1/4" of the spring is inserted into the suction cup, 3/4" of the spring is exposed

item #	dimensions	materials
SCDS-187	suction cup: 1-7/8" dia. base spring: 1" long with 3/4" dia. button	suction cup: clear PVC spring: steel w/plastic disc & foam tape

clear tack

The clear tack is sold coupled with several styles of Popco suction cups (SCMT-80, SCMT-118, SCT-187 and SCT-240) and will work in any style of Popco suction cup that has a 0.125" hole in the stem. Choose your ideal suction cup size and adhere your signs to that cup with the clear tack.

- combine the clear tack with a number of Popco suction cups
- pierce signs with the tack and connect to suction cups for sign display

item #	dimensions	materials
T-175C	0.675" dia. tack head - 0.32" long 3/32" shaft diameter	extra clear resin

clear tack w/foam tape

This tack is sold coupled with several styles of Popco suction cups and has been modified with the addition of a peel-and-stick adhesive disc. The tack will work in any style of Popco suction cup that has a 0.125" hole in the stem. Insert the tack and remove the adhesive disc's liner to attach signs.

- combine the clear tack with a number of Popco suction cups
- affix signs with the foam tape and connect to the suction cup for sign display

item #	dimensions	material
T-175CM	0.675" dia. tack head - 0.32" long 3/32" shaft diameter - 1/32" thick foam tape	extra clear resin white foam tape

nylon secure tack

The nylon tack is sold coupled with several styles of suction cups (SCNT-118 and SCNT-187) and will work in any style of Popco suction cup that has a 0.125" hole in the stem. Choose your ideal suction cup size and adhere your signage to that cup with the nylon secure tack.

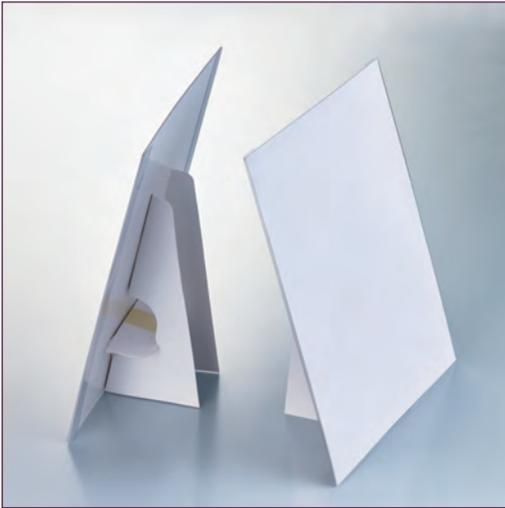

- combine the nylon tack with a number of Popco suction cups
- place the tack through pre-drilled signs and connect to suction cups for display

item #	dimensions	material
T-187N	0.615" dia. tack head - 0.32" long 3/32" shaft diameter	natural nylon

easels

Easels are ancient. It is estimated that they date from roughly 77 AD! Who knew? This much is sure, they've been simple and useful for many centuries. Popco's products

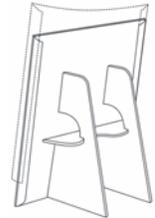

include a new spin on the easel. With our quick-fix easel, we've integrated a sheet protector into an easel back. We also offer chipboard easels with and without tape.

quick-fix easel

The quick-fix easel is a white card-stock, double-wing, easel with a clear plastic front piece that protects your inserts. Designed for 8-1/2" x 11" inserts, the quick-fix easel is cost-effective and reusable.

- free standing, intended for use on counter tops
- a backwards tilt increases the easel's stability
- reusable; the clear plastic front can be gently wiped clean
- the clear plastic front removes easily for inserts changing
- the double-wing easel back folds flat for shipping
- an inexpensive alternative to acrylic displays
- sold in packs of 25

item #	dimensions	materials
QFE-8511	8-1/2" wide - 11" high - 3-3/8" easel back 15 mil thick sheet protector	white 40 pt. cardstock clear plastic sheet protector

easels – natural

Popco offers double-wing easels in plain chipboard with or without foam tape applied. The easels ship flat and assemble quickly by simply folding the locking tab into position. Optional peel-and-stick foam tape makes completing your counter top displays even faster.

- 6" easels are offered with two pieces of 1" x 1" foam tape
- 9" and 12" easels are offered with two pieces of 1" x 3" foam tape

item #	height	tape style	color	materials

fold-up literature boxes

Take-aways (coupon books, product literature, etc.) are commonplace in retail settings. This makes Popco's fold-up literature boxes essential products. For economy

projects, or as an addition to short and medium-term display installations, Popco's literature boxes are simple, cost-effective tools for retail messaging.

TOB T-1S

The T-1S is a clear PVC literature box that accommodates business cards. The box measures 3-5/8" wide x 2" high x 1" deep and mounts to displays and printed pieces with permanent foam tape.

- holds business cards
- boxes ship flat and fold into shape along die-impressed fold lines
- peel-and-stick foam tape features easily removable liner for fast assembly

item #	dimensions	materials
TOB T-1S	3-5/8" wide - 2" high - 1" deep (3) 1/2" x 2" tape strips	clear PVC 15 mil thick white foam tape 1/32" thick

TOB 4-5

The TOB 4-5 is a clear PVC literature box that accommodates tri-fold brochures. The box measures 4-1/8" wide x 5" high x 1-1/4" deep and mounts to displays and printed pieces with permanent foam tape.

- holds tri-fold brochures
- boxes ship flat and fold into shape along die-impressed fold lines
- peel-and-stick foam tape features easily removable liner for fast assembly

item #	dimensions	materials

fold-up literature boxes

BLH-375

The BLH-375 is a clear PVC literature box that accommodates tri-fold brochures. The box measures 3-3/4" wide x 7-1/2" high x 1-1/2" deep. Shipped flat, the box assembles by locking into position with integrated tabs.

- holds tri-fold brochures
- top fold-back tab can affix to store shelving with small fasteners or tape
- sold in bundles of 50

item #	dimensions	materials
BLH-375	3-3/4" wide - 7-1/2" high - 1-1/2" deep (1) 1/2" x 2" tape strip (optional)	clear PVC 15 mil thick

BLH-550

The BLH-550 is a clear PVC literature box that accommodates printed pieces up to 5-3/8" wide. The box measures 5-1/2" wide x 6-1/2" high x 1-1/2" deep. Shipped flat, the box assembles by locking into position with integrated tabs.

- holds 5-3/8" wide printed pieces
- top fold-back tab can affix to store shelving with small fasteners or tape
- sold in bundles of 50

item #	dimensions	materials
BLH-550	5-1/2" wide x 6-1/2" tall x 1-1/2" deep (1) 1" x 3" tape strip (optional)	clear PVC 15 mil thick

TOB #4

The TOB #4 accommodates tri-fold brochures and is a free standing, cost-effective alternative to expensive acrylic literature boxes. The box measures 4-1/8" wide x 6-1/4" high x 1-1/2" deep. Shipped flat, the box assembles by locking into position with integrated tabs.

- holds tri-fold brochures
- boxes ship flat and fold into shape along die-impressed fold lines

item #	dimensions	materials
TOB #4	4-1/8" wide x 6-1/4" high x 1-1/2" deep	clear PVC 15 mil thick

business card pocket

Popco's clear, adhesive-backed pockets are ideal for adding business cards to printed pieces and presentation folders. Peel-and-stick application is fast and easy.

- holds standard business cards
- sold on sheets of 12

item #	dimensions	materials
CP-121	3-3/4" wide x 2-3/8" high	4.5 mil clear, soft poly vinyl clear rubber-based adhesive

rigid literature boxes

Take-aways (coupon books, product literature, etc.) are commonplace in retail settings. This makes Popco's literature holders essential products. For upscale

long-term projects, Popco offers rigid literature boxes. These boxes are available in standard sizes and in styles that wall-mount or can free stand on counter tops.

4" countertop literature holder

The C-40 countertop literature holder is a free standing literature box that accommodates tri-fold brochures. Made from extremely clear polystyrene, the C-40 is a hi-end product with a highly-finished look.

- holds tri-fold brochures up to 4" wide
- inside depth is 1-1/4", recommended max depth of printed pieces is 1-1/8"
- thick, strong construction makes the C-40 reusable many times
- literature holders are individually bagged to prevent scratches when shipping
- use on table-tops, counters and desks
- tilt-back design helps keep printed pieces in place and the literature holder stable

item #	dimensions	materials
C-40	4-1/4" wide - 7-1/2" high - 2-7/8" deep <i>depth includes back, angled supports</i>	clear polystyrene

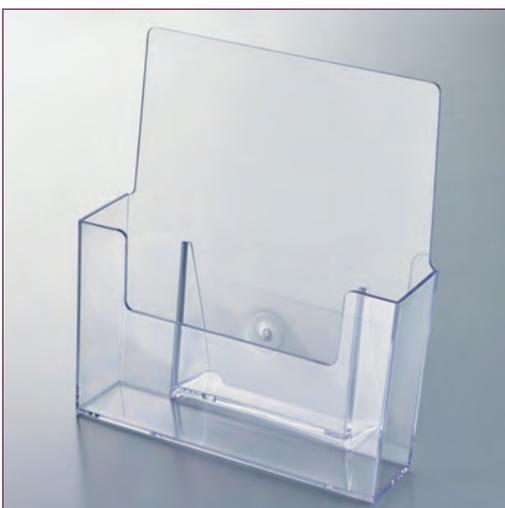

6" countertop literature holder

The C-60 countertop literature holder is a free standing literature box that accommodates 6" wide materials. Made from extremely clear polystyrene, the C-60 is a hi-end product with a highly-finished look.

- holds printed pieces up to 6" wide
- inside depth is 1-5/8", recommended max depth of printed pieces is 1-1/2"
- thick, strong construction makes the C-60 reusable many times
- literature holders are individually bagged to prevent scratches when shipping
- use on table-tops, counters and desks
- tilt-back design helps keep printed pieces in place and the literature holder stable

item #	dimensions	materials
C-60	6-1/4" wide x 8-1/4" high - 3" deep <i>depth includes back, angled supports</i>	clear polystyrene

9" countertop literature holder

The C-90 countertop literature holder is a free standing literature box that accommodates 8-1/2" wide materials. Made from extremely clear polystyrene, the C-90 is a hi-end product with a highly-finished look.

- holds printed pieces up to 8-1/2" wide
- inside depth is 2", recommended max depth of printed pieces is 1-3/4"
- thick, strong construction makes the C-90 reusable many times
- literature holders are individually bagged to prevent scratches when shipping
- use on table-tops, counters and desks
- tilt-back design helps keep printed pieces in place and the literature holder stable

item #	dimensions	materials
C-90	9" wide x 9-3/4" high - 3-3/4" deep <i>depth includes back, angled supports</i>	clear polystyrene

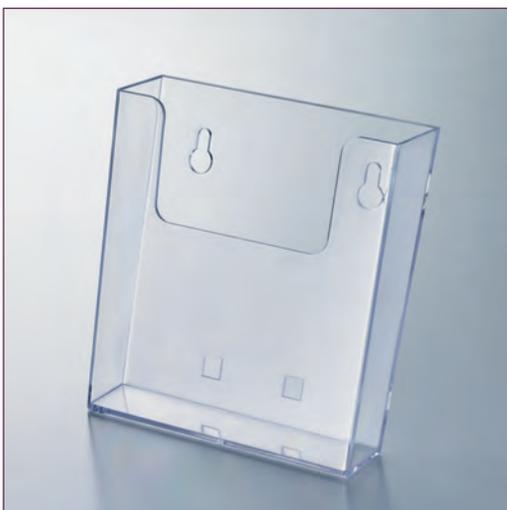

4" wall-mount literature holder

The W-40 wall-mount literature holder accommodates tri-fold brochures. Made from extremely clear polystyrene, the W-40 is a hi-end product with a highly-finished look.

- holds tri-fold brochures up to 4" wide
- inside depth is 1-1/4", recommended max depth of printed pieces is 1"
- thick, strong construction makes the W-40 reusable many times
- literature holders are individually bagged to prevent scratches when shipping
- mount to vertical surfaces, attaching by keyhole cut out or with screws
- holes for screw mounting are on the box back
- literature holders can be customized with foam tape on the back for mounting

item #	dimensions	materials
W-40	4-1/4" wide - 6-1/2" high - 1-1/4" deep	clear polystyrene

6" wall-mount literature holder

The W-60 wall-mount literature holder accommodates 6" wide materials. Made from extremely clear polystyrene, the W-60 is a hi-end product with a highly-finished look.

- holds printed pieces up to 6" wide
- inside depth is 1-1/2", recommended max depth of printed pieces is 1-1/4"
- thick, strong construction makes the W-60 reusable many times
- literature holders are individually bagged to prevent scratches when shipping
- mount to vertical surfaces, attaching by two keyhole cut outs
- literature holders can be customized with foam tape on the back for mounting

item #	dimensions	materials
W-60	6-1/4" wide - 6-3/4" high - 1-3/8" deep	clear polystyrene

9" wall-mount literature holder

The W-90 wall-mount literature holder accommodates 8-1/2" wide materials. Made from extremely clear polystyrene, the W-90 is a hi-end product with a highly-finished look.

- holds printed pieces up to 8-1/2" wide
- inside depth is 2", recommended max depth of printed pieces is 1-3/4"
- thick, strong construction makes the W-90 reusable many times
- literature holders are individually bagged to prevent scratches when shipping
- mount to vertical surfaces, attaching by keyhole cut out or with screws
- holes for screw mounting are on the box back
- literature holders can be customized with foam tape on the back for mounting

item #	dimensions	materials
W-90	9-1/4" wide - 9-5/8" high - 2-1/4" deep	clear polystyrene

book rings

Joining multiple pages together is made easy with Popco's book rings. Our rings are intended for projects that require periodic changing of pages, for example:

color swatch books, recipe books or signs hung over wire. Popco has book rings in metal and plastic and they are ideal for hand assembly — no tools are needed.

steel snap rings

Steel snap rings are ideal fasteners for swatch books, brochures and for light-weight signs. Hinged on one side, the rings flex open to pass through drilled pages, or over wire shelves. Then, the rings “snap” shut over a notched closure point.

- fasten swatch books, brochures and light-weight signs
- a hinged point allows the rings to open wide for assembly
- the notched connection points latch together forming a smooth closure
- as a standard item, the rings are available in a silver finish
- as a custom order, black rings are available (restrictions and minimums apply)
- steel rings are sold in a closed position
- steel rings are sold pre-bagged — bag quantity depends on the size of the ring

item #	inside diameter	bag quantity	color	material
SSR-060	0.58"	200	silver	nickel-plated steel <i>not ISO parts</i>
SSR-075	3/4"	200		
SSR-100	1"	200		
SSR-150	1-1/2"	100		
SSR-200	2"	50		
SSR-300	3"	10		

plastic rings

Popco's high-quality plastic binder rings are ideal fasteners for swatch books, brochures and for light-weight signs. A unique hook-and-slot fastening point makes for a smooth, finished look once the rings are closed. Plastic binder rings are available in three diameters and two colors.

- fasten swatch books, brochures and lightweight signs
- the hook-and-slot fastening point forms a smooth surface once closed
- lightweight and very durable
- as a standard item, the rings are available in black and white
- as a custom order, other colors are available (restrictions and minimums apply)
- steel rings are sold in an open position for quick assembly
- plastic rings are sold online in batches of 100 or bulk packed when ordering through a Popco representative

item #	inside diameter	color	material
313502	1/2"	black	Delrin thermoplastic
317002	11/16"	black	
322002	7/8"	black	
313501	1/2"	white	
317001	11/16"	white	
322001	7/8"	white	

rings available in black & white only

beaded chain & locking straps

Whether used for connecting printed pieces such as sample books, or for linking together panels on hanging displays, beaded chains are uniquely versatile and useful.

Popco offers beaded chains in a number of lengths and also other, similar, connectors like reusable plastic locking straps, cable ties and ultra-thin security loops.

metal beaded chain

Metal beaded chain is often used to connect product samples and swatches to store shelving. Beaded chain can also connect items to displays, connect multi-panel hanging signs, or be used anywhere a flexible, reusable connector is needed.

- #3 beads (3/32" diameter)
- clasp on one end

item #	length	color	material
NBC-4	4"	silver	nickel-plated steel
NBC-6	6"		
NBC-12	12"		

plastic beaded locking strap

Attach tags to products or store shelving with plastic beaded locking strap. This part is easily adjusted, reusable and well suited to fast hand-assembly.

- use to connect tags to product or to shelving
- easily installed and adjusted
- reusable

item #	length	color	material
LS-4N	4"	natural	#6/6 nylon
LS-8N	8"	natural	
LS-8B	8"	black	

nylon cable ties

Nylon cable ties are used to affix signs to store shelving, or to connect tags to product. The cable ties are tamper-resistant since they must be cut to be removed. Easily adjusted, cable ties are well suited to rapid hand-assembly.

- for secure, tamper resistant connection of tags to product
- NCT-08 – 8" long (40 lb. test)
- NCT-11 – 11" long (50 lb. test)

item #	length	color	material
NCT-08	8"	natural	#6/6 nylon
NCT-11	11"		

nylon security loops

Nylon locking straps, also known as security loops, are used to affix tags to product. The straps are tamper-resistant since they must be cut to be removed. The straps are well suited to rapid hand-assembly.

- for secure, tamper resistant connection of tags to product
- often used in combination with hanging buttons (see page 14)

item #	length	color	material
140302	5"	natural	#6/6 nylon
140303	9"		

magnetic products

Popco carries a small but essential selection of magnetic tape on the roll. Varieties include segments (kiss-cut on rolls) and continuous rolls so you can cut lengths as

needed. Sign display with magnetic tape is terrific since the look is very clean (with no visible sign holder) and signs can be easily repositioned.

adhesive-backed magnetic tape

Adhesive-backed magnetic tape is ideal for mounting signs on metal shelving, racks or refrigerators. Popco stocks magnetic tape on continuous rolls, or segmented rolls (at several lengths). Non-stock segmented lengths are available as a custom order.

- adhere signs to metal surfaces
- ideal for signs that are frequently moved or changed
- featuring a removable liner over a rubber-based adhesive
- sold by the roll, either segmented or continuous
- continuous rolls are easily cut to special lengths with heavy scissors or a utility knife
- custom-length segments are available by special order

item #	roll style	segments per roll	colors
MTape-1x2	1" x 2" segments	600	black
MTape-1x3	1" x 3" segments	400	w/clear adhesive & white liner
MTAPE-500X100	1/2" x 100-foot	1 continuous	
MTape-1X100	1" 100-foot	1 continuous	

finned diverse sign foot

The finned diverse sign foot is a versatile, T-shaped, sign base that accepts stock from 1/8" to 3/16" thick and is available with a channel-magnet on the base.

see page 19

magnetic channel

Ceramic magnets, mounted inside steel channels, create a super strong magnetic bond for a variety of P.O.P applications.

see page 19

magnetic sign-base boot

Use the magnetic sign boots, in combination with the matching heavy-walled poster channels, to mount signs to metal surfaces.

see pages 19

magnetic hanging disc

Create an attachment point on metal surfaces with the magnetic hanging disc. This part is ideal for hanging light signs from metal drop-ceiling grids.

see page 19

stand-off sign components

Add dimension to posters and displays with Popco's adhesive-backed, foam stand-offs. Foam stand-offs are lightweight and easily applied to light constructions

such as foam board and coroplast displays. The simple addition of dimensionality to displays is a great way to make graphics pop.

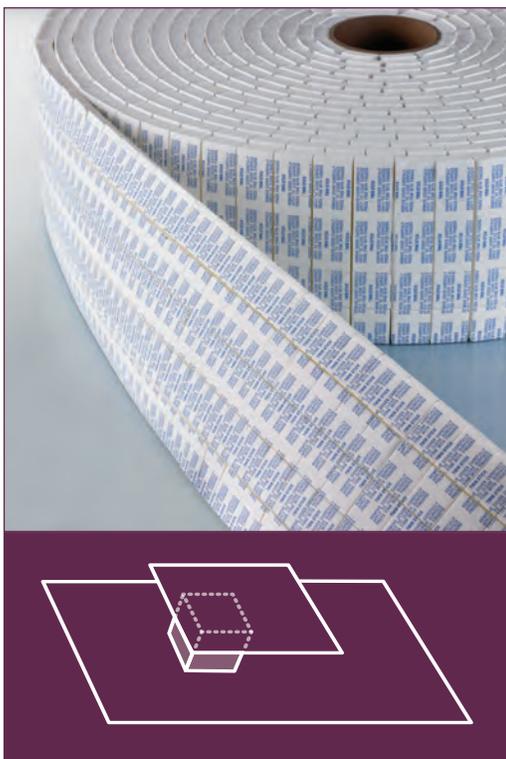

foam spacer blocks on pads

1" foam spacer blocks on pads create a 3-D pop-out effect on displays and signs. With adhesive backs and peel-and-stick liners, foam spacer blocks are designed for rapid assembly. Popco's foam spacer blocks on pads are stocked in two colors and in one size. Other sizes are available as a custom order.

- add 3-D pop-out effects to graphics
- combine 1" and 1/2" high stand offs to create multi-layered displays
- used to create aisle violators
- adhere to many surfaces such as corrugate, chipboard, wood and metal
- works on high-gloss surfaces such as print pieces with UV coatings
- features aggressive, rubber-based, adhesive
- intended for indoor use
- recommended for use in temperatures from 65° to 100° fahrenheit
- direct exposure to sunlight should be avoided, the spacer blocks are not UV resistant

item #	format	colors	dimensions	colors
AS-111	pads of 36	white	1" x 1" base	permanent
AS-111Black		black	1" high	rubber-based film

foam spacer blocks on rolls

1/2" foam spacer blocks on rolls create a 3-D pop-out effect on displays and signs. With adhesive backs and peel-and-stick liners, foam spacer blocks are designed for rapid assembly. Popco's foam spacer blocks on rolls are stocked in just one color (white) and one size, but other sizes and black are available as a custom order.

- combine 1/2" and 1" high stand offs to create multi-layered displays
- adhere to many surfaces such as corrugate, chipboard, wood and metal
- works on high-gloss surfaces such as print pieces with UV coatings
- features aggressive, rubber-based adhesive
- when a 1/2" spacer block is removed from the roll's continuous liner, one side of adhesive is revealed making rapid hand assembly easy

item #	format	color	dimensions	colors
AS-115	rolls of 3000	white	1" x 1" base 1/2" high	permanent rubber-based film

Velcro® is arguably one of the most versatile products on the planet. From fashion to fastening cables, or sign-mounting to display-construction, there's many projects

that benefit from Velcro®. Popco covers the essentials with adhesive-backed Velcro® tape, circular “coins” and mated segments either kiss-cut on rolls or bulk-packed.

Velcro® hook/loop tape

Velcro® hook-and-loop tape is useful in many ways for creating displays and affixing signs to a wide variety of surfaces. Popco stocks adhesive-backed Velcro® in three sizes and two colors, all on 25 yard rolls.

- hook is abrasive in texture
- loop is soft in texture
- all styles feature permanent film adhesive with removable liner
- the high-tack adhesive adheres quickly for immediate use

item #	style	colors	width	roll length
TRB-625-HB	hook	black	5/8"	25 yards for all styles and widths
TRB-625-HW	hook	white		
TRB-625-LB	loop	black		
TRB-625-LW	loop	white	3/4"	
TRB-750-HB	hook	black		
TRB-750-HW	hook	white		
TRB-750-LB	loop	black		
TRB-750-LW	loop	white	1"	
TRB-1000-HB	hook	black		
TRB-1000-HW	hook	white		
TRB-1000-LB	loop	black		
TRB-1000-LW	loop	white		

Velcro® hook/loop tape pre-mated rolls

For rapid assembly of displays and signs, Popco offers pre-mated Velcro® hook-and-loop squares on the roll—kiss-cut in two lengths. Adhesive backed, with a removable liner, pre-mated Velcro® squares are a popular product for a variety of point-of-purchase applications.

- the hook side is backed on the roll's continuous liner
- the loop side has individual segments of kiss-cut liner
- featuring permanent film adhesive
- the high-tack adhesive adheres quickly for immediate use

item #	dimensions	squares per roll	style	color
TRB-3/4X3/4W	3/4" square	1175	mated	white
TRB-1X1W	1" square	890	hook/loop	

Velcro® hook/loop coins

For rapid assembly of displays and signs, Popco offers Velcro® hook and loop “coins”. The adhesive-backed coins remove easily from a continuous roll of liner material. Popco stocks Velcro® coins in four sizes and two colors

- ideal for rapid hand-assembly of displays and signs
- all styles feature permanent, high tack adhesive
- the high-tack adhesive adheres quickly for immediate use

item #	style	colors	diameter	coins per roll
RBD-375-HB	hook	black	3/8"	1750
RBD-375-HW	hook	white

RBD-875-LB	loop	black		
RBD-875-LW	loop	white		

Velcro® hook/loop tape pre-mated strips

For rapid assembly of displays and signs, POCO offers pre-mated Velcro® hook-and-loop strips. The strips are adhesive-backed, with removable liner on both the hook and loop sides. Popco’s stock dimension is 1" x 3". Other custom widths and lengths are available.

- use for very strong, yet removable, sign holding
- the loop side has an identifying mark
- featuring permanent film adhesive
- the high-tack adhesive adheres quickly for immediate use

item #	dimensions	strips per bag	style	color
TRB-1X3White	1" x 3"	300	mated hook/loop	white

magik frames

Magik Frames are a “less-is-more” product. “LESS” in a visual sense since there’s only a non-glare protective sheet over your printed piece. Much “MORE” in the

mounting sense. Two micro-adhesion strips hold Magik Frames firmly to many surfaces: glass, smooth wood, even sheetrock if the texture is smooth.

magik frames

The revolutionary new Magik Frame holds signs in place on nearly any surface and, at the same time, functions as a sheet protector. Magik Frame can be repositioned and reused many times and it will leave no residue or cause any damage to the surface to which it is applied. Magik Frame is also usable on both hot and cold surfaces.

specs

- top and bottom, removable, micro-adhesion strips (not tape)
- adhesion strips offered in black and white
- scratch-resistant, non-glare, sheet protector

configurations

- available in three sizes, each size pre-packed
- small — 5-1/2" x 8-1/2" — in packs of five
- medium — 8-1/2" x 11" — sold in packs of three
- large — 11" x 17" — sold in packs of two

uses & features

- mount signs to walls, windows, cooler doors, or auto glass
- ideal for frequently changing signs and notices
- popular with institutions — educational, medical and government
- can be reused many times
- adhesive strips can be cleaned after repeated use and reused

remove liner from the adhesion strips

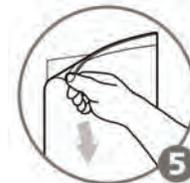

apply to surface starting at the bottom

insert sign behind the frame

press down on the top strip

to remove, simply pull off

item #	width	height	strip color	qty per pack

MKF1117W-12	11"	17"	white	2

wobblers & mobiles

Motion attracts eyes to your marketing pieces, and Popco has a selection of wobbly sign holders and twirling mobile components that bring motion to your designs.

Wobblers support display components or signs on cash registers and slot machines. Mobile components bring movement to overhead displays in retail spaces.

deko spring

The deko spring attracts attention to small signs with a bobbing and wiggling motion. Two mounting bases are positioned on either side of a spring. One base mounts to displays, counters, cash registers, slot machines and many other surfaces, the other base mounts to signs.

- mounts securely to both horizontal and vertical surfaces
- sold in bags of 100

item #	dimensions	color	materials
DS-1	3/4" mounting-base diameter 1-1/4" overall length	white	plastic bases - steel spring permanent foam tape

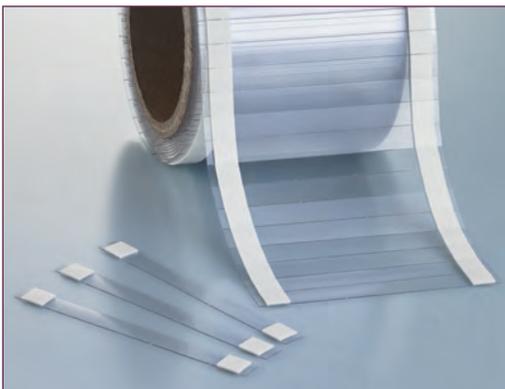

aluminum twist wobbler

The aluminum twist wobbler holds small signs to cash registers, slot machines or nearly any surface. The soft metal easily bends and adjusts so that the sign faces just where you'd like it. Two tape tabs at each end of the wobbler connect a sign to a mounting surface.

- mount small signs to cash registers, slot machines or displays
- sold in boxes of 100

item #	dimensions	color	materials
WS-2A	3" long x 13/16" wide x 1/16" high	silver	soft, flexible, aluminum permanent foam tape

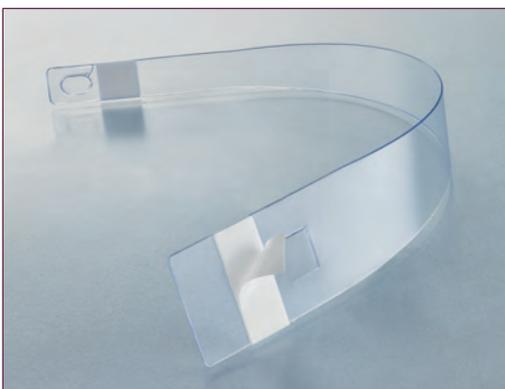

mini wobbler strip

Mini wobbler strips are a simple, low-cost and effective way to add motion to your small signs. Adhere one end of a mini wobbler to displays, counters, cash registers and many other surfaces. Adhere the other side of the wobbler to small signs and the flexible PVC material adds motion to the sign.

- intended for signs weighing up to 1/2 ounce
- sold on rolls of 1000

item #	dimensions	color	materials
WS-4-10	4" long x 3/8" wide x 10 mil thick	clear	clear PVC permanent film tape

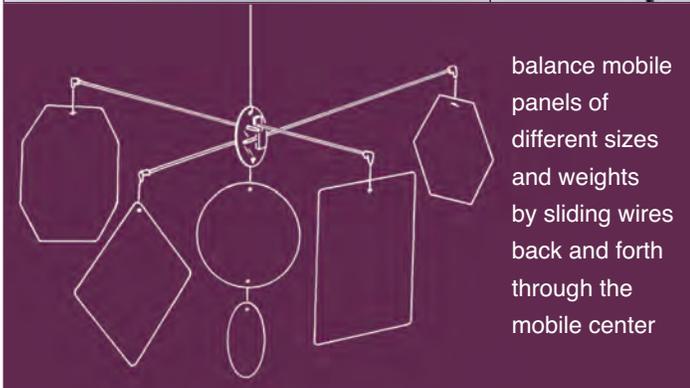

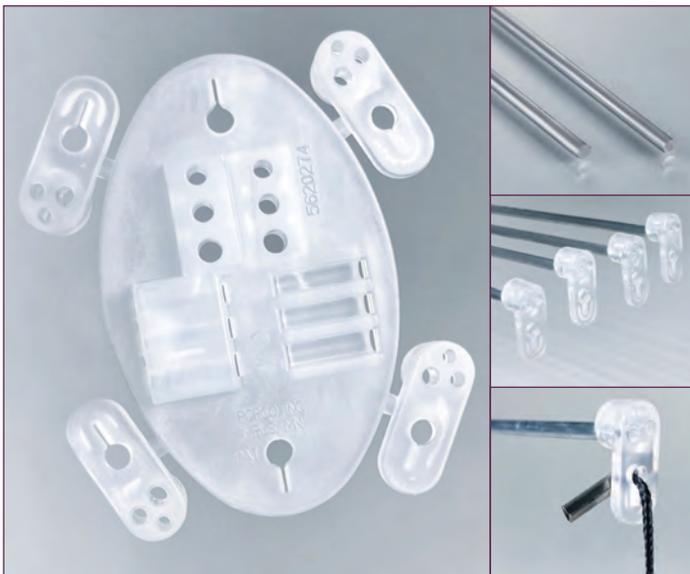

large wobbler strip

Large wobbler strips are a simple, low-cost and effective way to add motion to your small and medium-sized signs. Adhere one end of a large wobbler to displays, store shelves or cash registers — adhere the other end to small signs, and the flexible PVC material adds motion to the sign.

- use the top hanging tab, rather than the foam tape, for two-sided signs up to 1 ounce
- sold in bags of 100

item #	dimensions	color	materials
WS-1C	8" long x 1" wide bottom x 3/8" wide top x 15 mil thick	clear	clear PVC permanent foam tape

mobile turtle

The mobile turtle is a simple and versatile central fastener for lightweight mobiles. The turtle provides a central hanging point, and has holes into which wires can be inserted to create a four-armed mobile. The turtle has twist-off end caps which mount on the end of the wires providing hanging points for mobile panels.

- cost-effective and simple — no tools required for assembly
- creates a four-arm mobile which turns freely from a central hanging point
- connect the turtle center and the endcaps to the mobile panels with barbed string (page 11)

item #	dimensions	color & material
MWT-7	center: 1-1/8" wide x 1-3/4" high endcaps: 1/4" wide x 5/8" long	natural HDPE plastic

mobile wires

The mobile wires are sized, in both diameter and length, to work perfectly with the mobile turtle center. Four wires are required to fully utilize the mobile turtle's design.

- insert mobile wires into the holes of the turtle center
- slide the wires through the center as needed to accommodate mobile panels of different sizes

item #	dimensions	color & material
13-092	0.093" wire diameter 13" long	galvanized steel

3-sided mobile kit

The 3-sided mobile kit includes two mobile center pieces, one c-hook with string and six pieces of double-sided foam tape. With this collection of parts, 3-panel, triangular mobiles can be held together and hung.

- mobile centers are made from natural polypropylene
- white plastic c-hooks feature 8 feet of polyester string and a metal, barbed end for connecting to the center's hanging point

item #	dimensions
M3S-D kit	(2) mobile centers: 4-1/2" diameter (1) c-hook: 2-1/2" high x 2-1/4" wide - 8 foot string (6) 1/2" x 3" x 1/32" pieces permanent white foam tape
